

Det här är ett exempel på montering av rummet. Det är layout 1 som visas i monteringsanvisningen. Ytterligare tre exempel på montering finns på nästa sida. Siffrorna visar i vilken ordning väggarna ska monteras. Väggarna på layouten är även märkta med materialet. P=plast, G=glas, B=Svart glas, W=Träpanel, D=Glasdörr, S=Glasskjutdörr.

The pictures show an example how to assemble the room. In the assembly instruction, layout 1 is described.

Three additional examples how to assemble are described on the following page.

The numbers show in what order the walls should be assembled. The walls on the layout are marked according to material: P=plastic, G=glass, B=Black glass, W=Wooden panel, D=glass door, S= sliding glass door

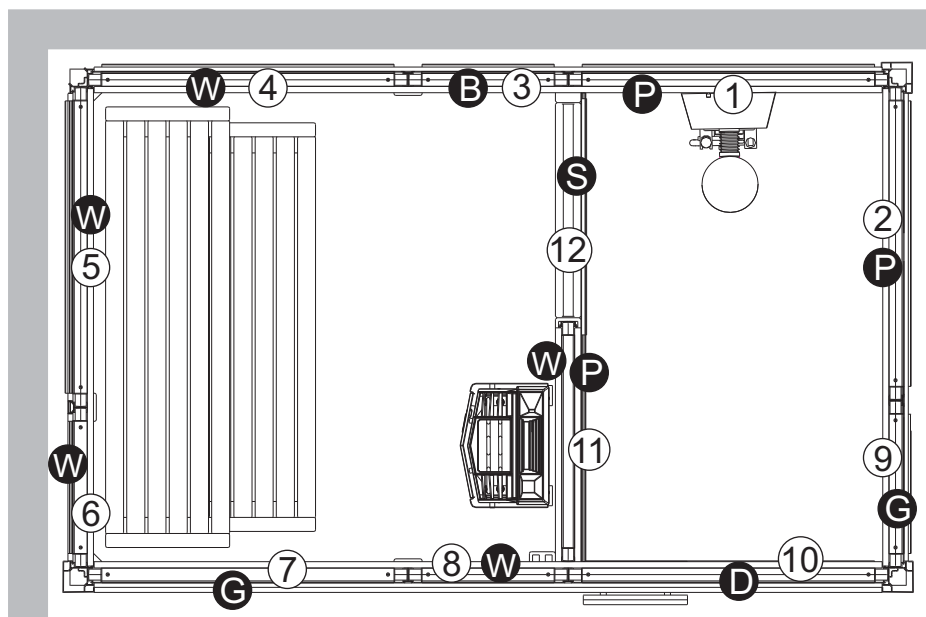

Layout 1

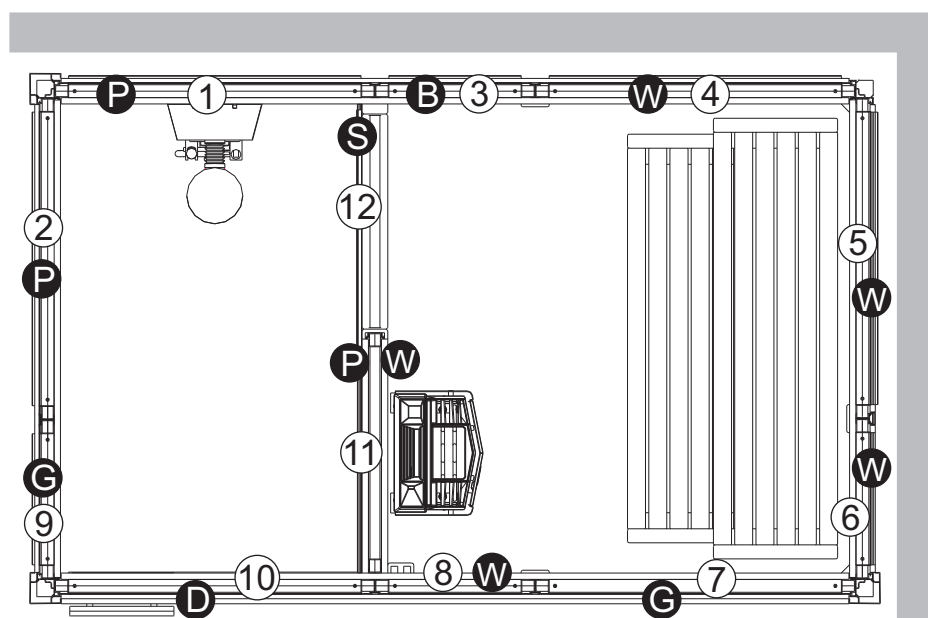

OBS! Det är monteringen av layout 1 som visas i resten av anvisningen. Tillvägagångssättet för att montera rummen är dock densamma.

N.B. It is the assembly of layout 1 that is described on the following pages. The procedure to assemble the rooms is however the same.

Grejer bra att ha
Stuff good to have

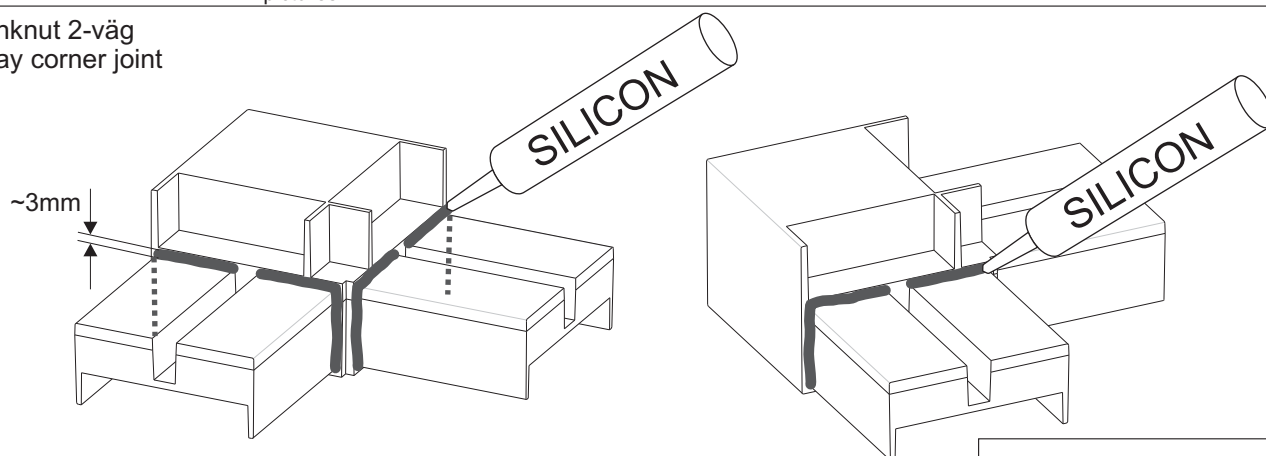

1 Montering av golvram Assembly of floor frame

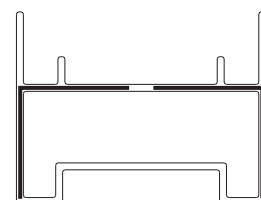

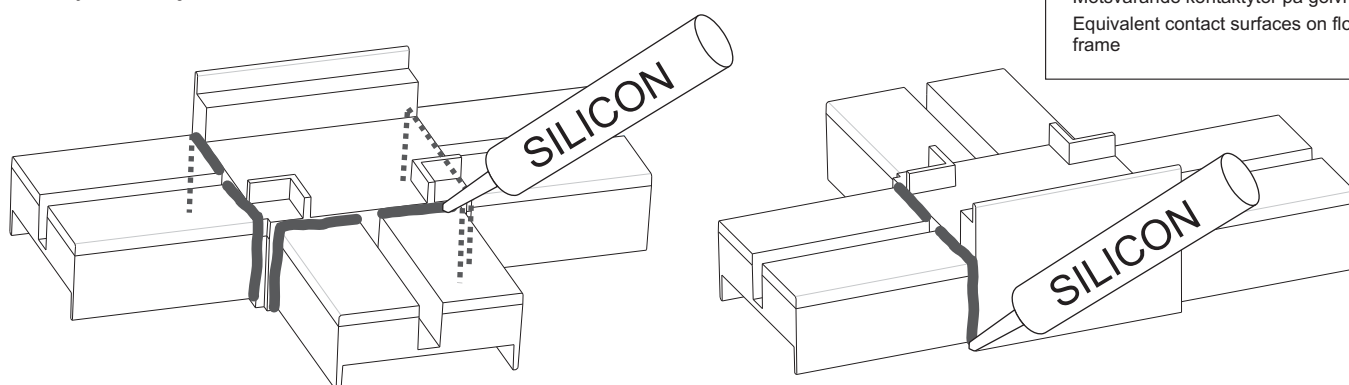

Lägg en sträng med silicon på hörnknutarna enligt bilderna.

Put a string of silicone on the corner joints according to the pictures.

Hörnknut 2-väg 2-way corner joint

Hörnknut 3-väg 3-way corner joint

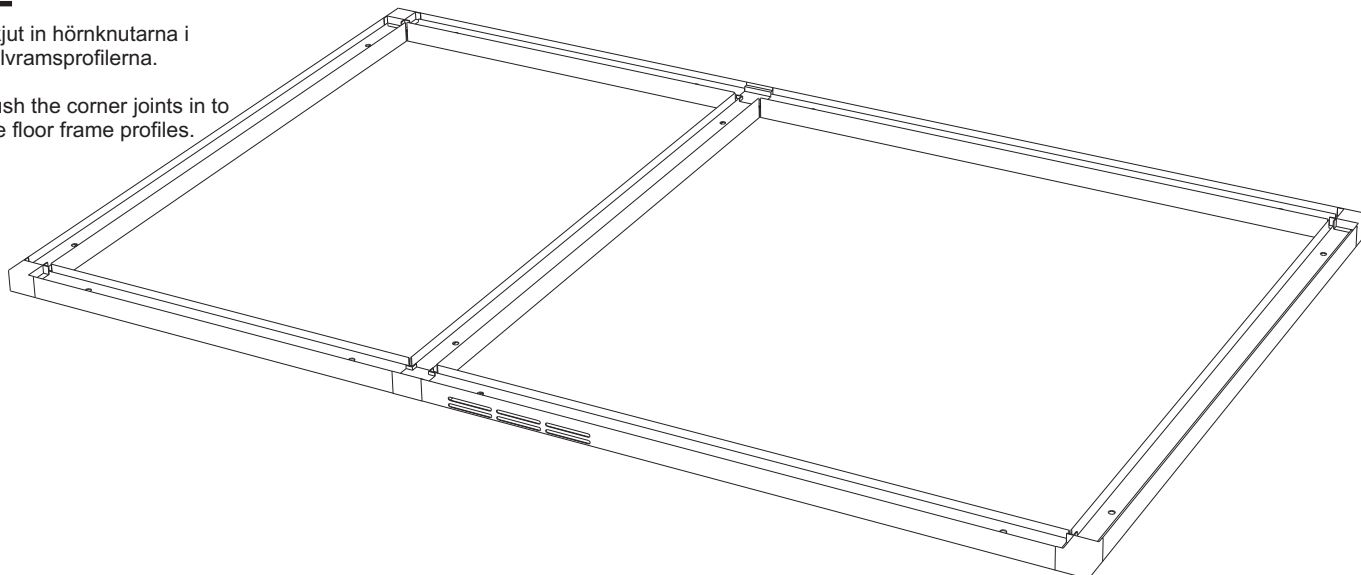

Motsvarande kontaktytor på golvram.
Equivalent contact surfaces on floor frame

2

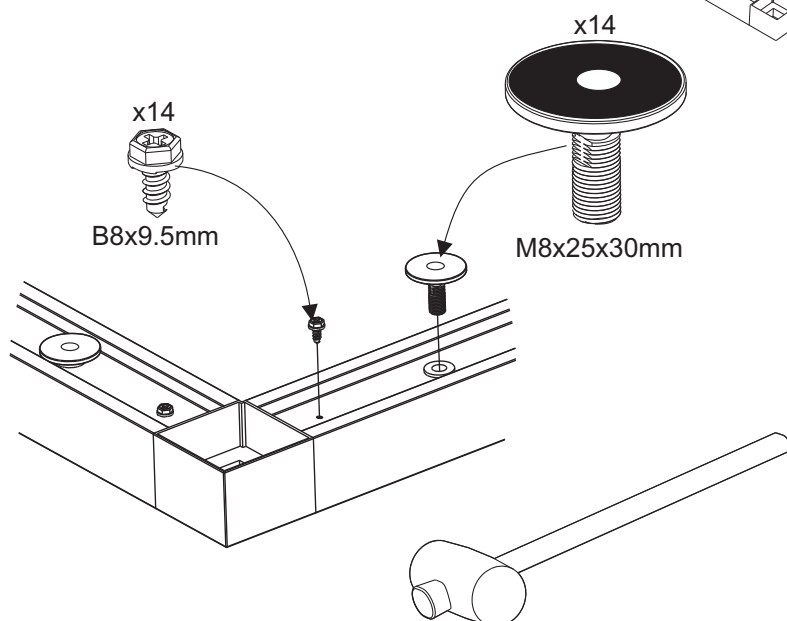

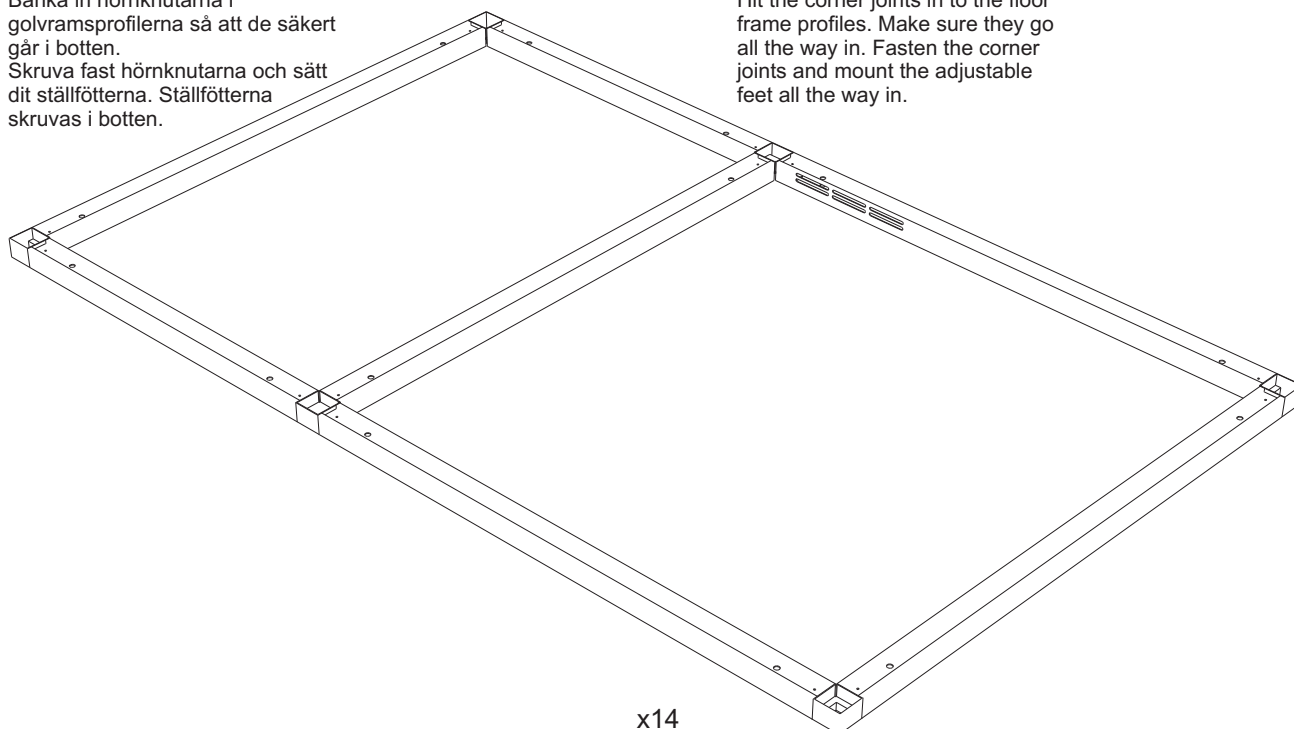

Skjut in hörnknutarna i golvramsprofilerna.

Push the corner joints in to the floor frame profiles.

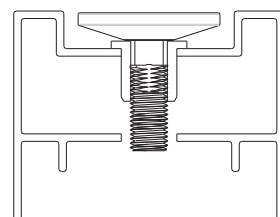

Vänd golvramen upp och ned.
Banka in hörnknutarna i golvramsprofilerna så att de säkert går i botten.
Skruva fast hörnknutarna och sätt dit ställföterna. Ställföterna skruvas i botten.

Turn the floor frame upside down.
Hit the corner joints in to the floor frame profiles. Make sure they go all the way in. Fasten the corner joints and mount the adjustable feet all the way in.

x14
B8x9.5mm

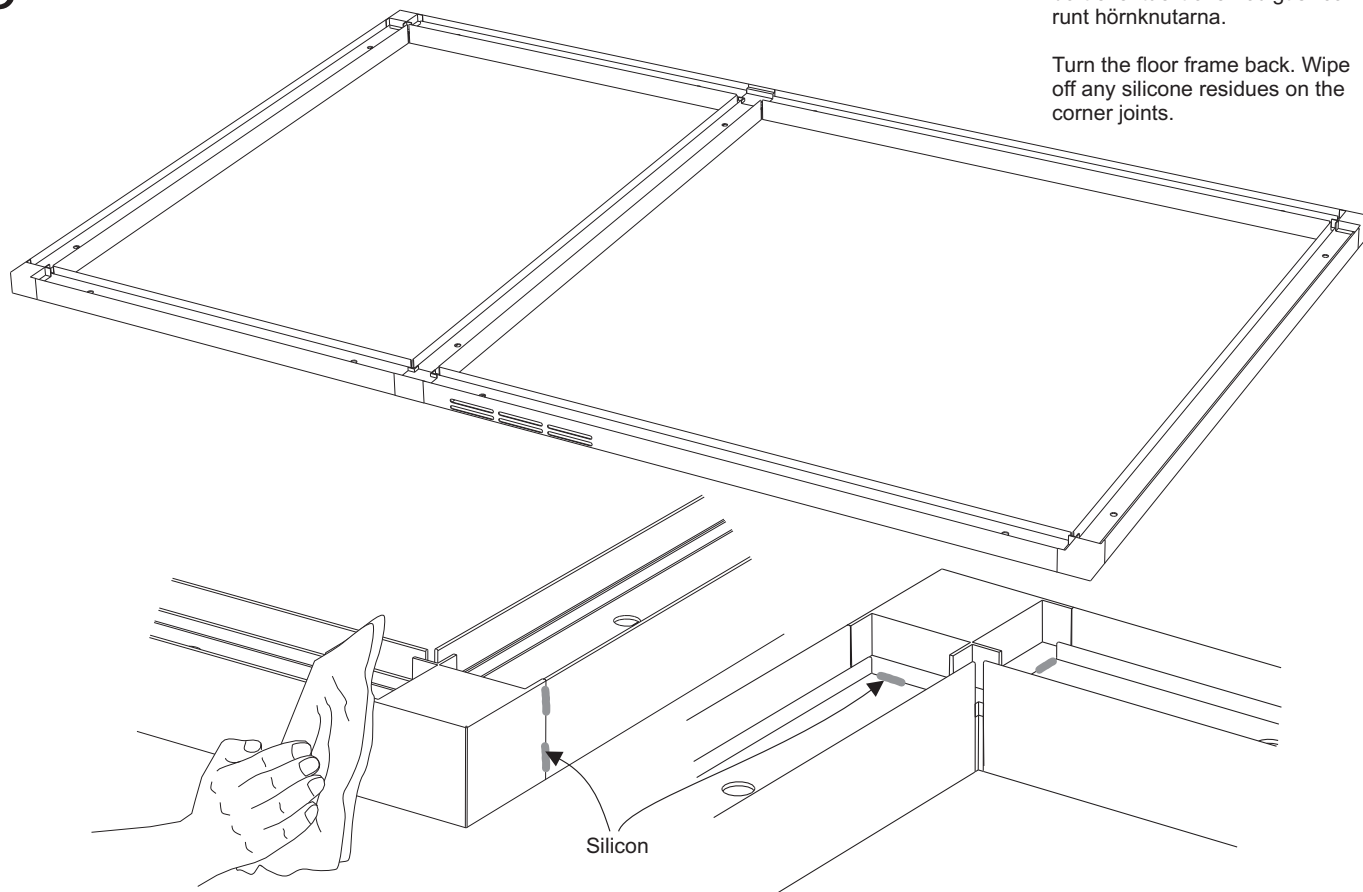

x14
M8x25x30mm

3

Vänd tillbaka golvramen. Torka bort eventuellt överflödigt silicon runt hörnknutarna.

Turn the floor frame back. Wipe off any silicone residues on the corner joints.

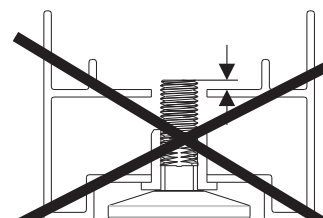

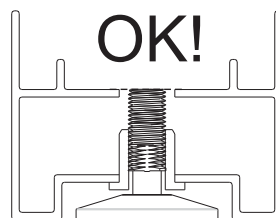

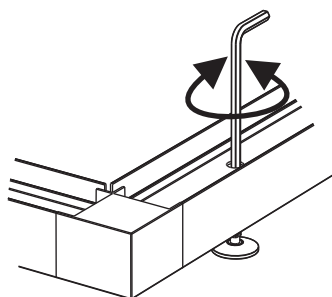

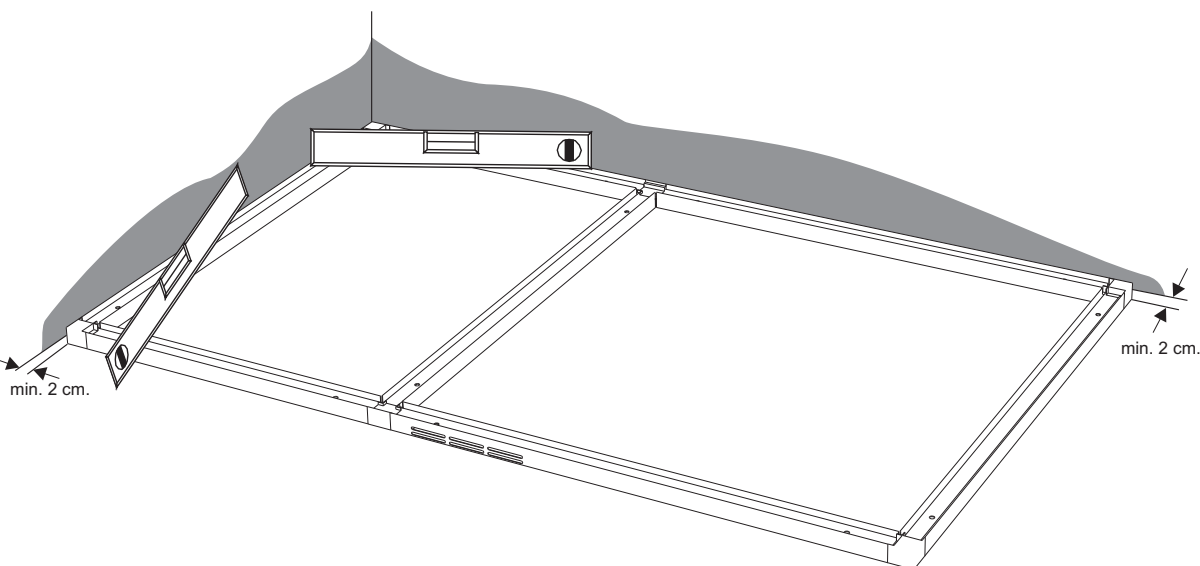

4

Placera golvramen där rummet ska stå. Kontrollera att ramen ligger plant, använd vattenpass. OBS! Det är ett absolut krav att golvramen ligger plant "i väg" för att slutresultatet ska bli perfekt. Justera ställföterna med insexnyckeln. Det är viktigt att ställföten hamnar under ytan där väggarna ska stå.

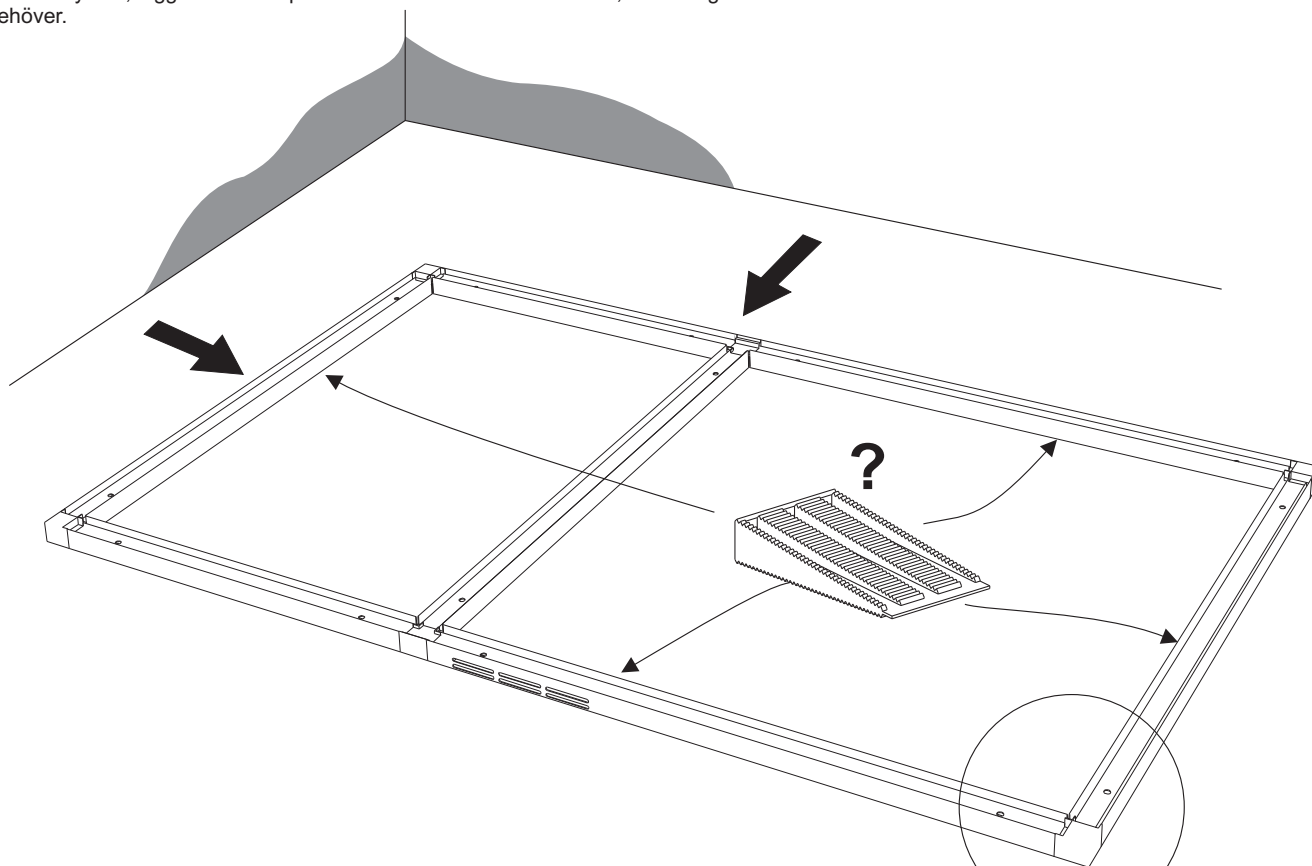

Place the floor frame where the room should stand. Use a spirit level to ensure the floor frame is plane.

N.B! To reach a perfect result it is of utmost importance that the floor frame is completely Plane. Use the hex key to the adjustable feet. Make sure the screw from the adjustable feet is positioned according to picture.

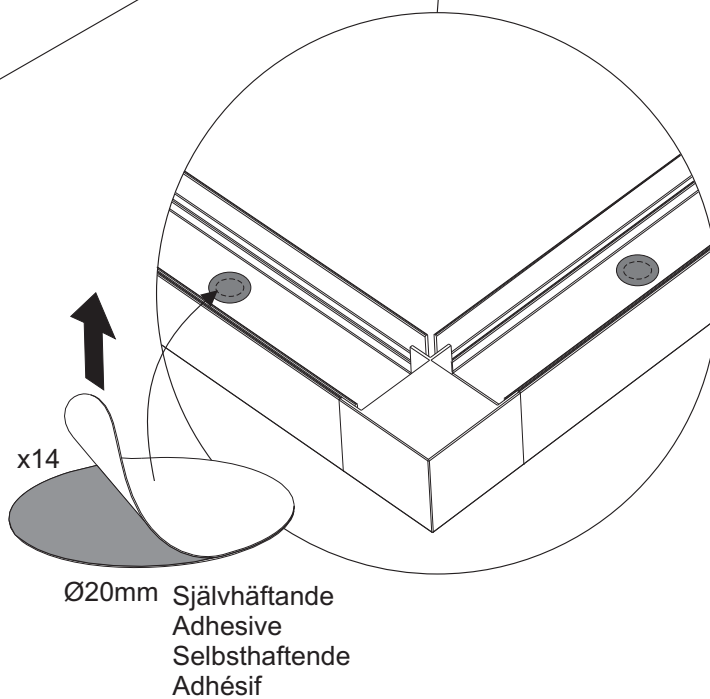

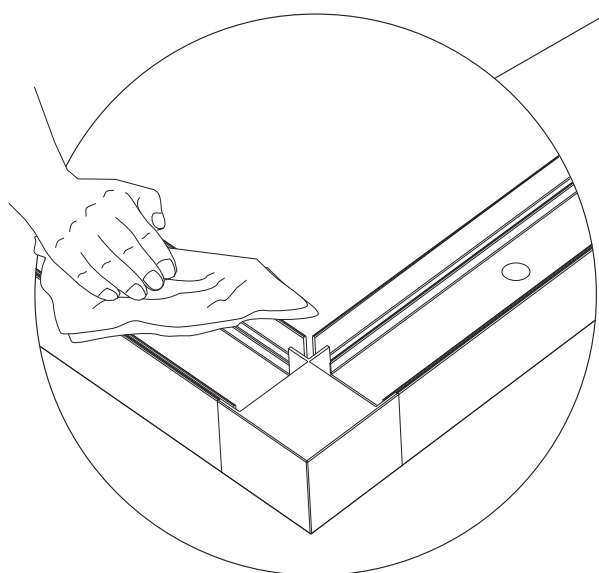

- 5** Flytta ut golvramen om den står nära en vägg för att lätt kunna montera väggarna. Om golvramen inte är plan när den flyttats, lägg under kilar på de ställen som behöver.

To make assembly easier, pull the floor frame out if it is close to a wall. If the floor frame is not plane when moved, use wedges when needed.

Torka rent runt hålen ovanför ställfötterna och sätt dit tätningscirkarna.

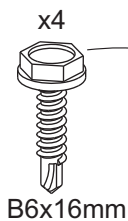

Wipe the holes clean above the adjustable feet and attach the adhesive circle pieces.

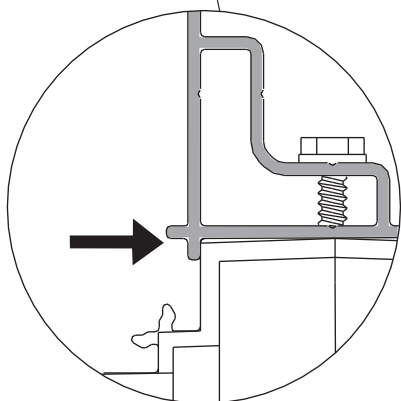

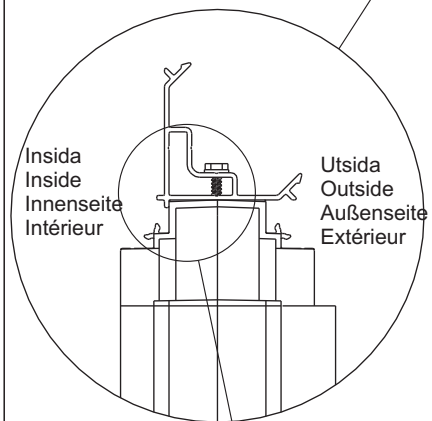

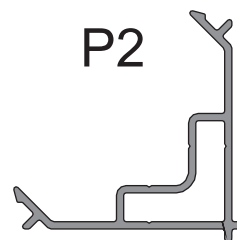

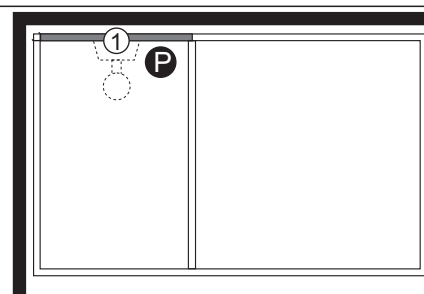

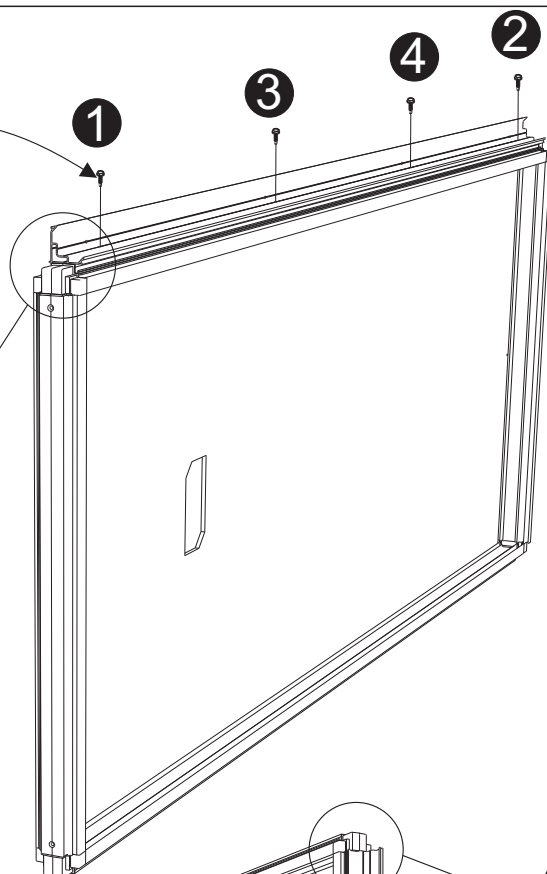

6

Skruva alltid dit den översta skruven först, sedan den nedersta och till sist de båda skruvarna i mitten.

Always start with the upper screw, then the lower one and finally the ones in the middle.

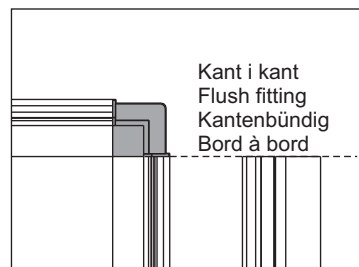

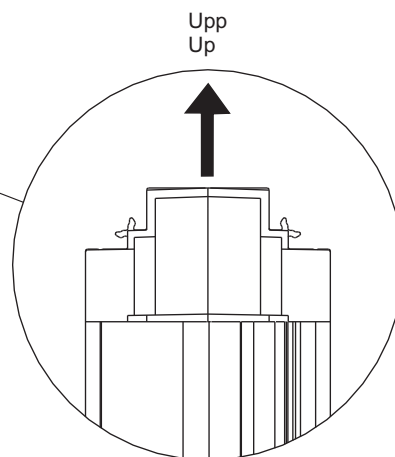

B6x16mm

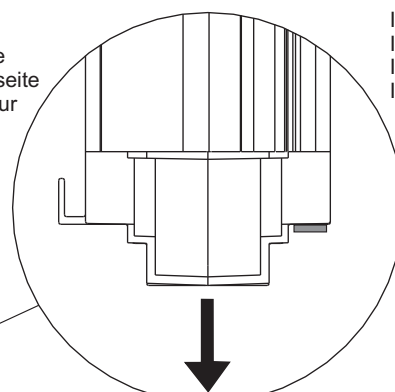

OBS! Det är viktigt att hörnprofilen ligger dikt an mot väggen. Tryck profilen mot väggen när den skruvas i.

N.B.! It is important that the corner joint is completely close to the wall. Push the profile to the wall when you assemble it.

Justering av hjulupphängning:

De övre hjulfästena, (A) fixeras med stoppskruven (B) då duschdörren hänger i rätt position (C).

Viktigt !

För att dörren enkelt skall kunna snäppas av vid t ex. rengöring, skall de nedre hjulfästena ej skruvas fast. (Hjulen är fjädrande).

Adjustment of the wheel suspension:

Fixate the upper wheel brackets (A) with the stop screw (B) when the shower door is hanging in the right position (C).

Important!

For the door to easily snap off, for example to facilitate cleaning, do not screw on the lower wheel brackets. (The wheels are resilient).

Justierung der Radaufhängung:

Die oberen Achsstützen (A) mit der Stoppschraube (B) fixieren, wenn die Duschtür in der rechten Position hängt (C).

Wichtig!

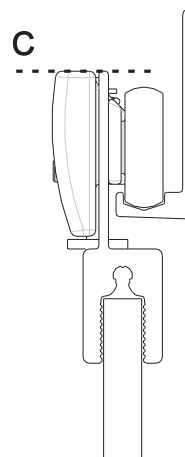

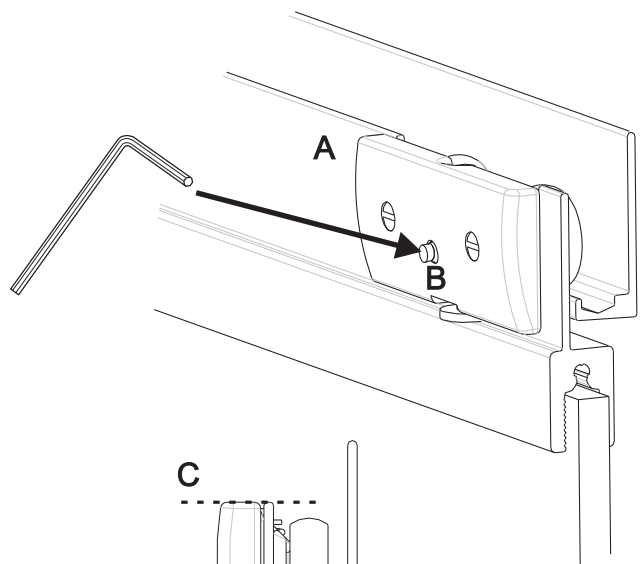

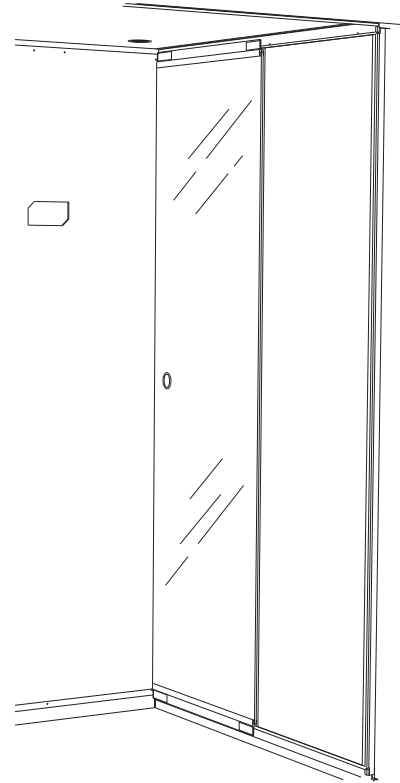

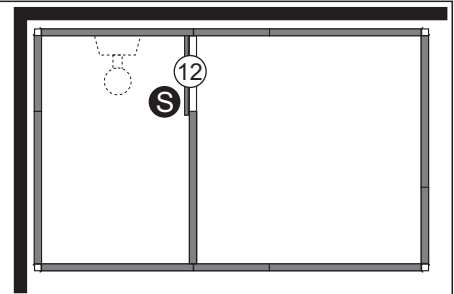

Um die Tür einfach abhaken zu können, zum Beispiel bei Reinigung, schrauben Sie nicht die niedrigen Achsstützen fest. (Die Raden sind federnd).

Mode de fixation des roulettes suspendues:

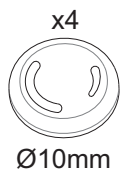

Positionner les pièces (A), support de roulette supérieure, et les fixer à l'aide de la vis (B) tandis que la porte de douche est suspendue en bonne position selon schéma (C).

Très important!

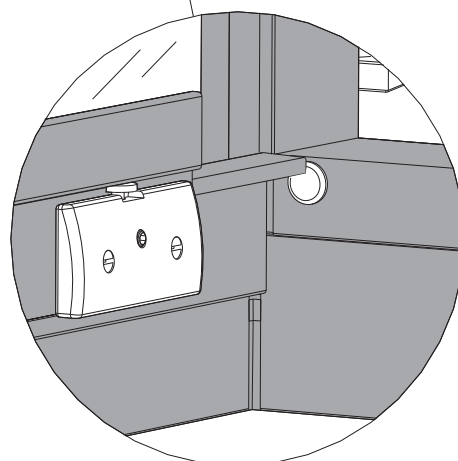

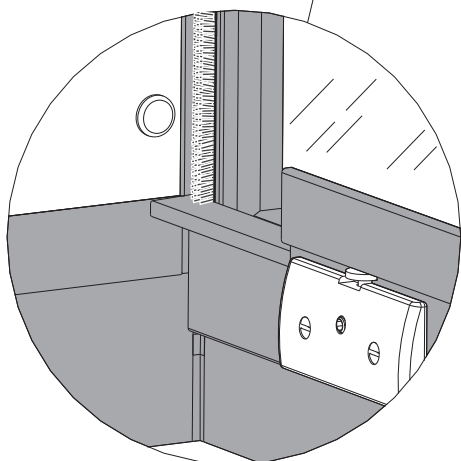

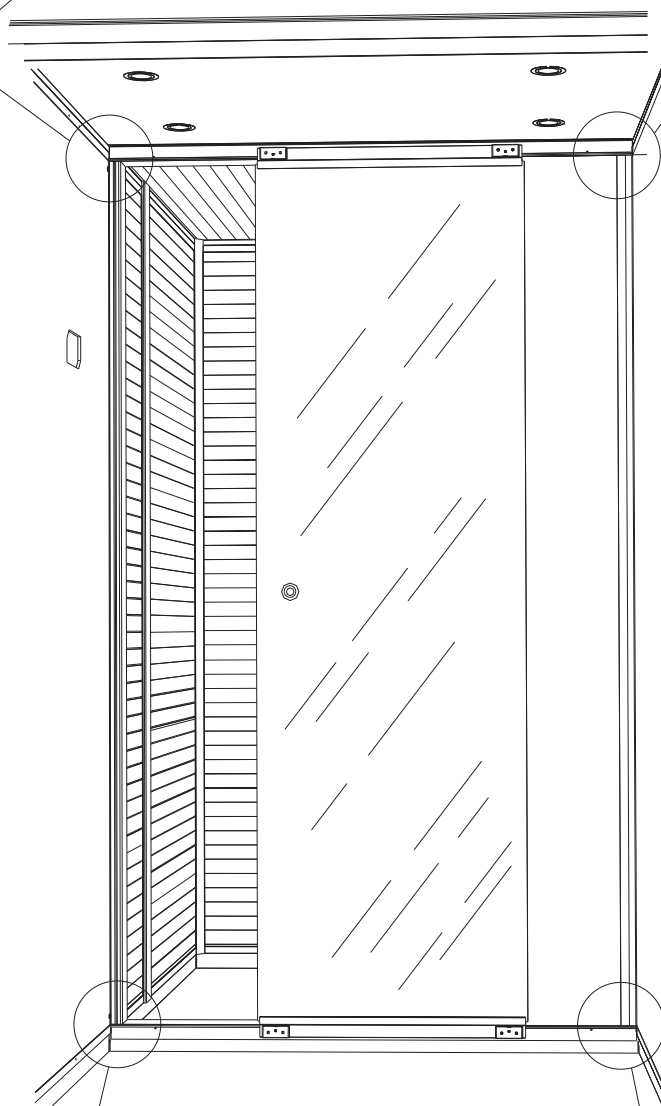

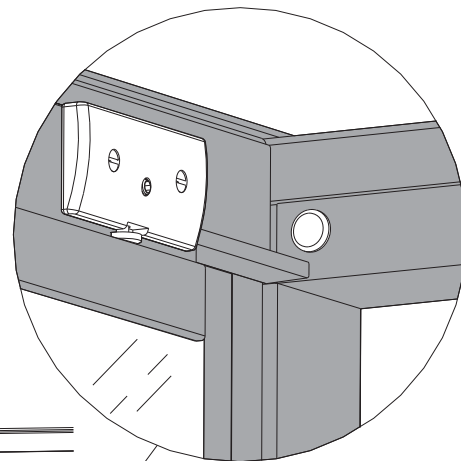

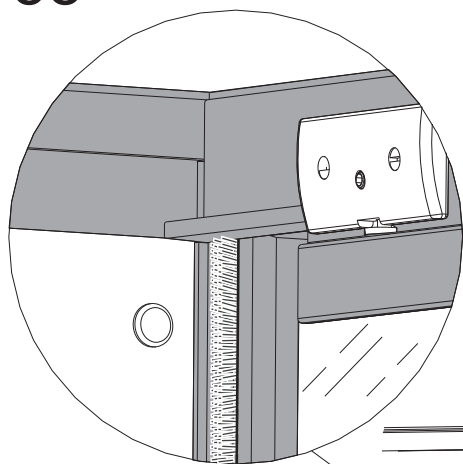

Pour faciliter le démontage de la porte, par exemple pour un nettoyage, ne pas visser les pièces maintenant les roulettes du bas, qui sont montées sur ressort.

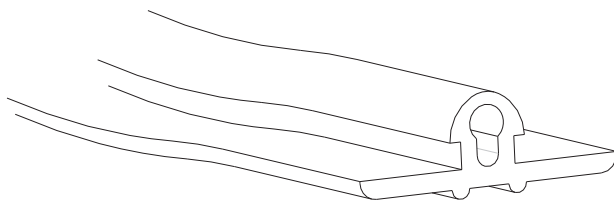

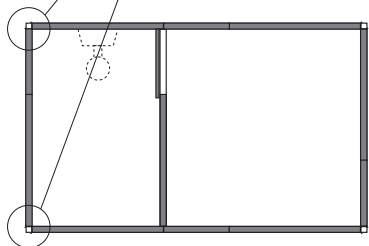

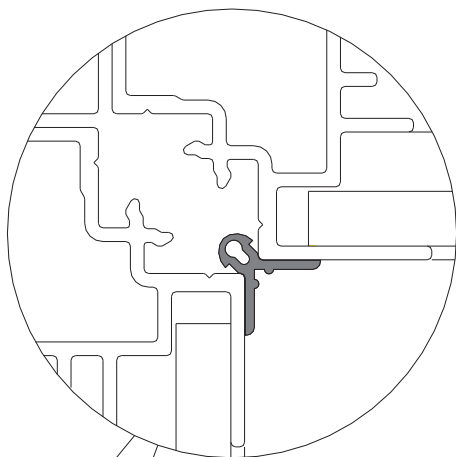

58

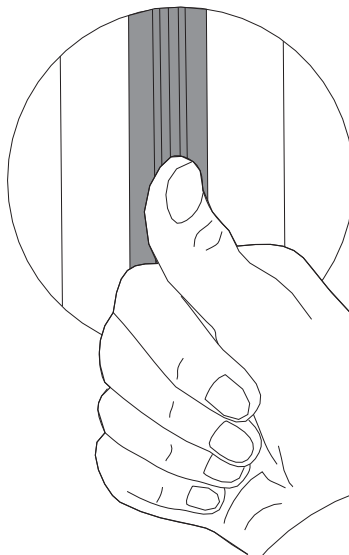

Dörrdämpare
Door silencer

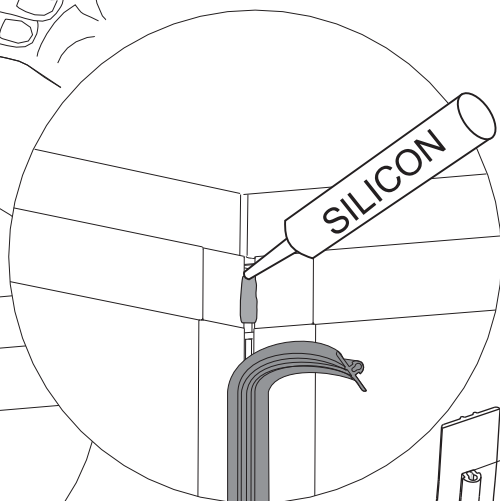

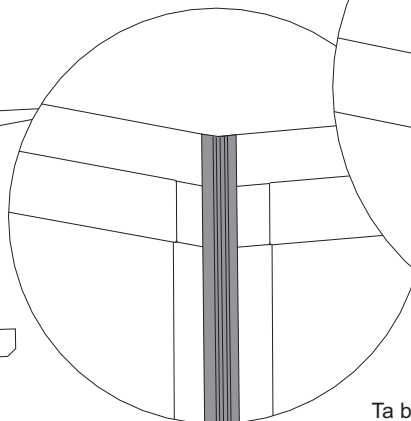

14.5x5mm

Sätt i listen upp mot taket och klipp av den nertill enligt bild längst ned på sidan. Punkttryck på listen för att fästa den i spåret. Listan får inte tänjas ut.

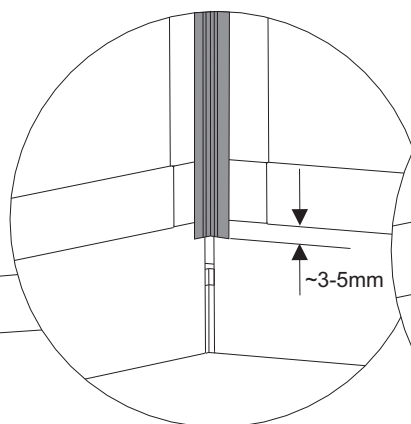

Put the sealing strip up against the ceiling and cut it off at the bottom according to picture. Push the strip with your hand to fasten it. Make sure the sealing strip is not elongated.

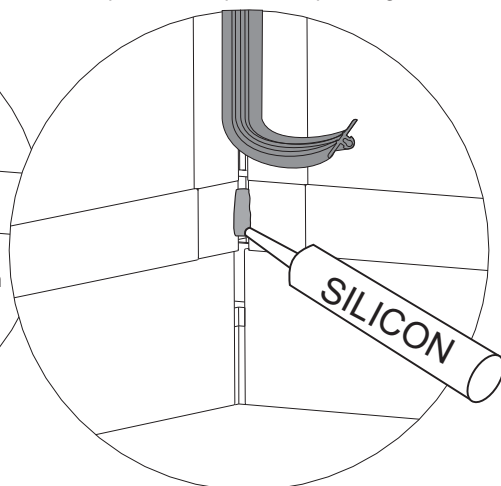

~15mm

Ta bort listen en liten bit både uppe och nere. Om listen ej går in i spåret längst upp mot taket så klipp bort lite av listen enligt bild. Sätt dit en liten silikonsträng och tryck dit listen igen.

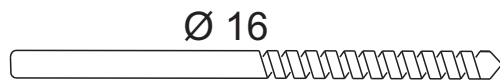

Lift a small piece of the sealing strip at the top and bottom. If the strip doesn't fit at the top, cut a small piece off according to picture. Put a small string of silicone and push the strip back in place again.

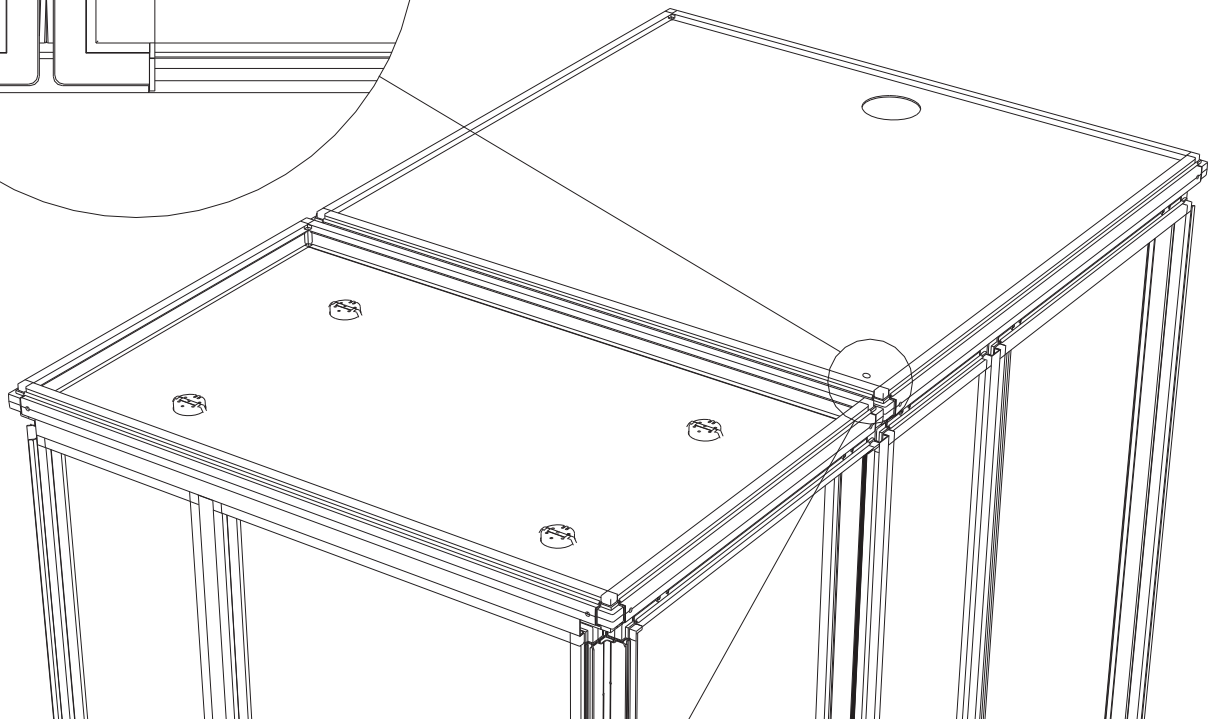

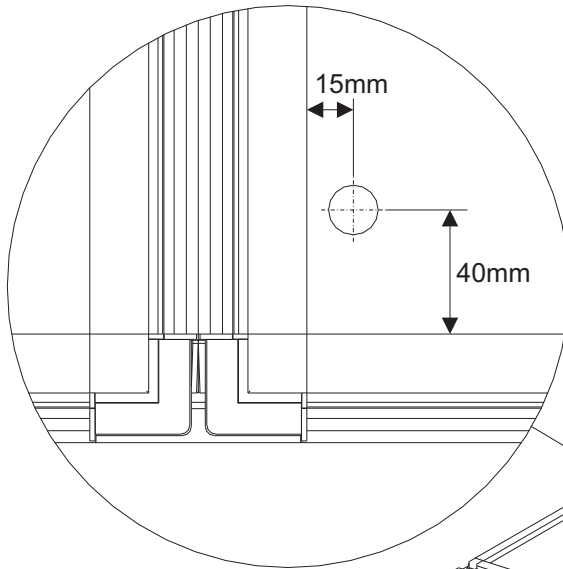

~3-5mm

SILICON

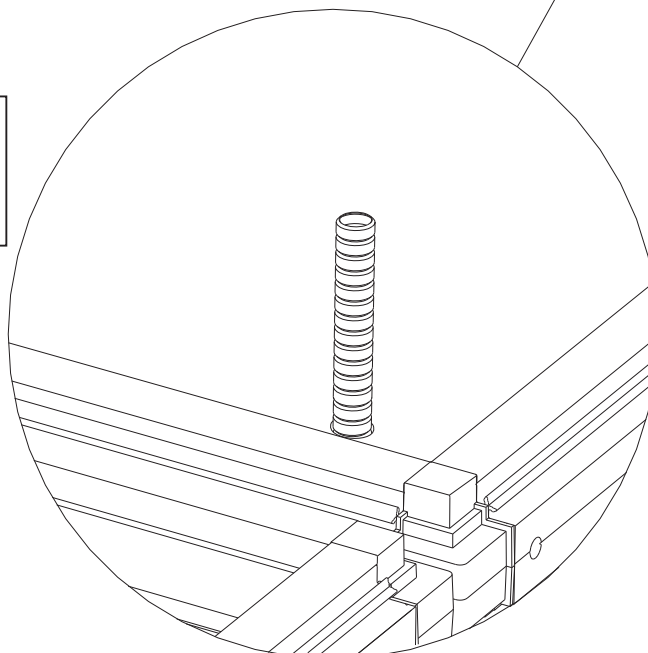

Borra hål för kabelkanalen.
Drill holes for the cable.

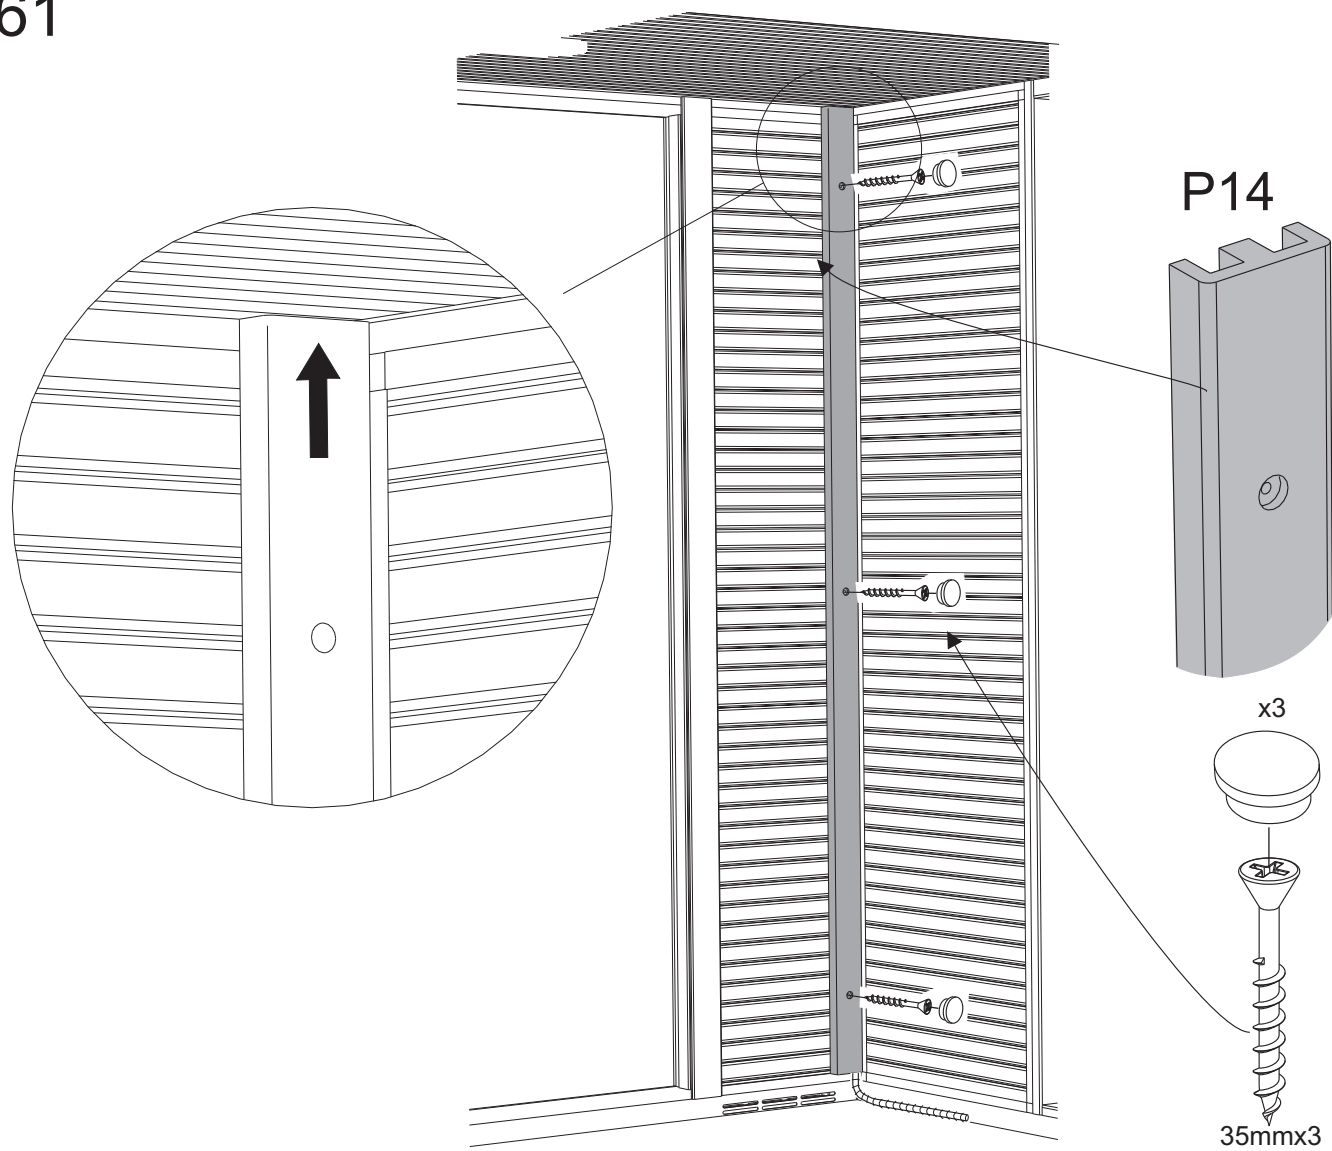

Värmebeständig kabel (170°C)
Heat resistant cable (170°C)
Hitzbeständiges Kabel (170°C)
Câble résistant aux
températures élevées (170°C)

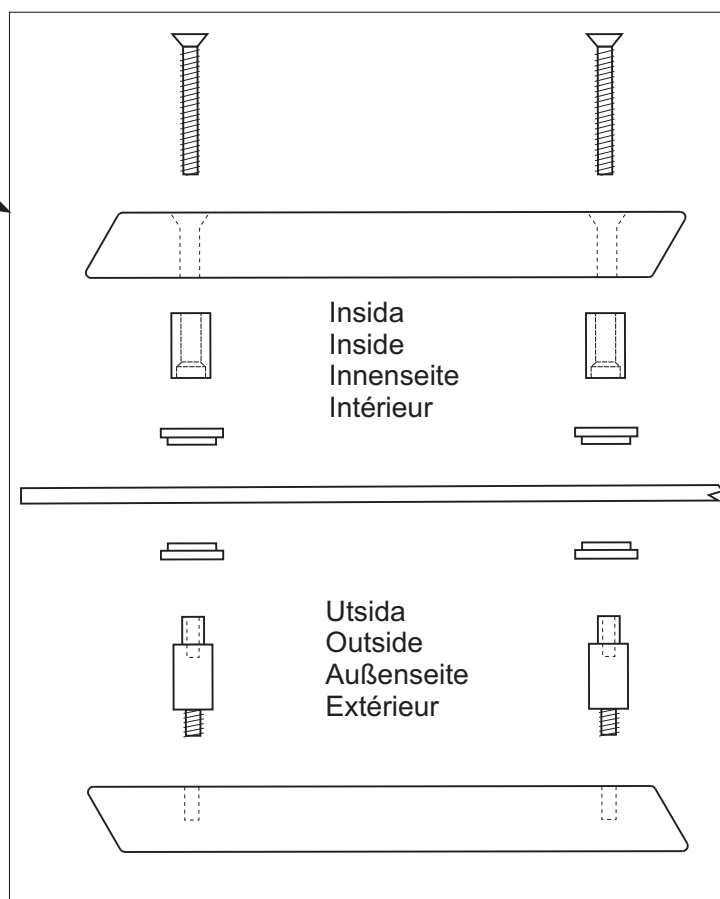

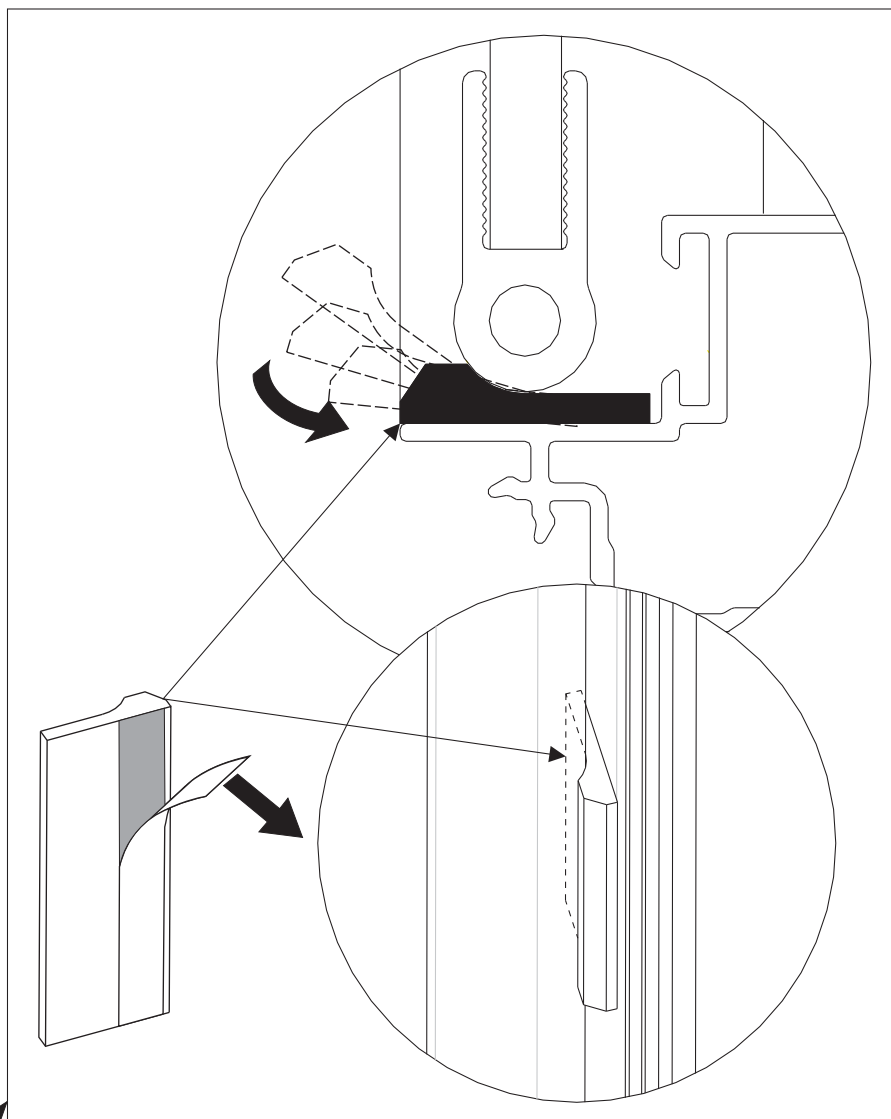

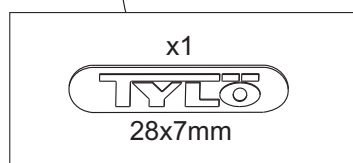

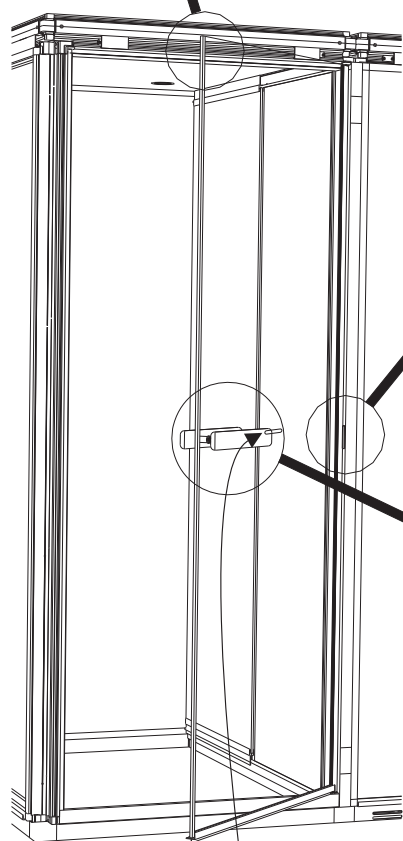

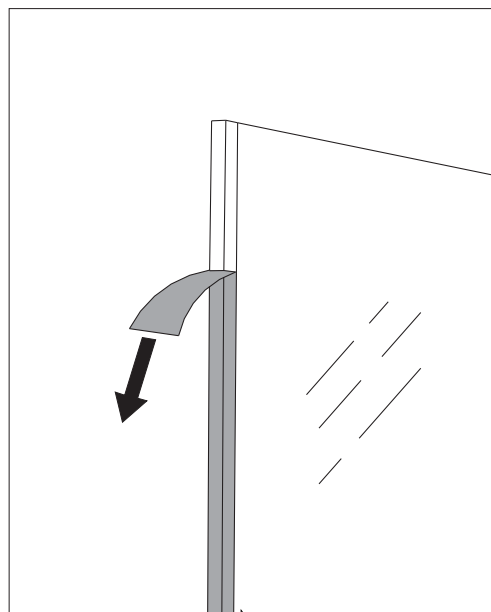

Stoppa i kabelkanalen genom taket.
Push the cable through the roof.

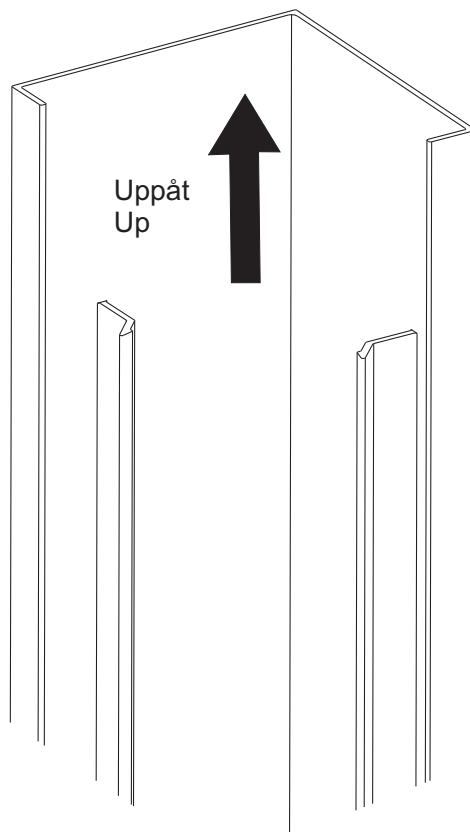

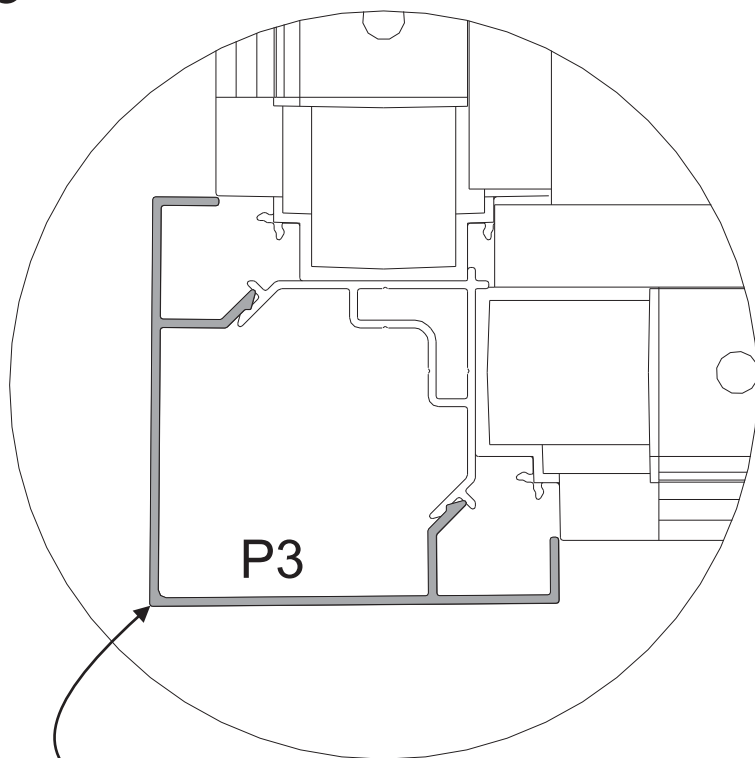

61

62

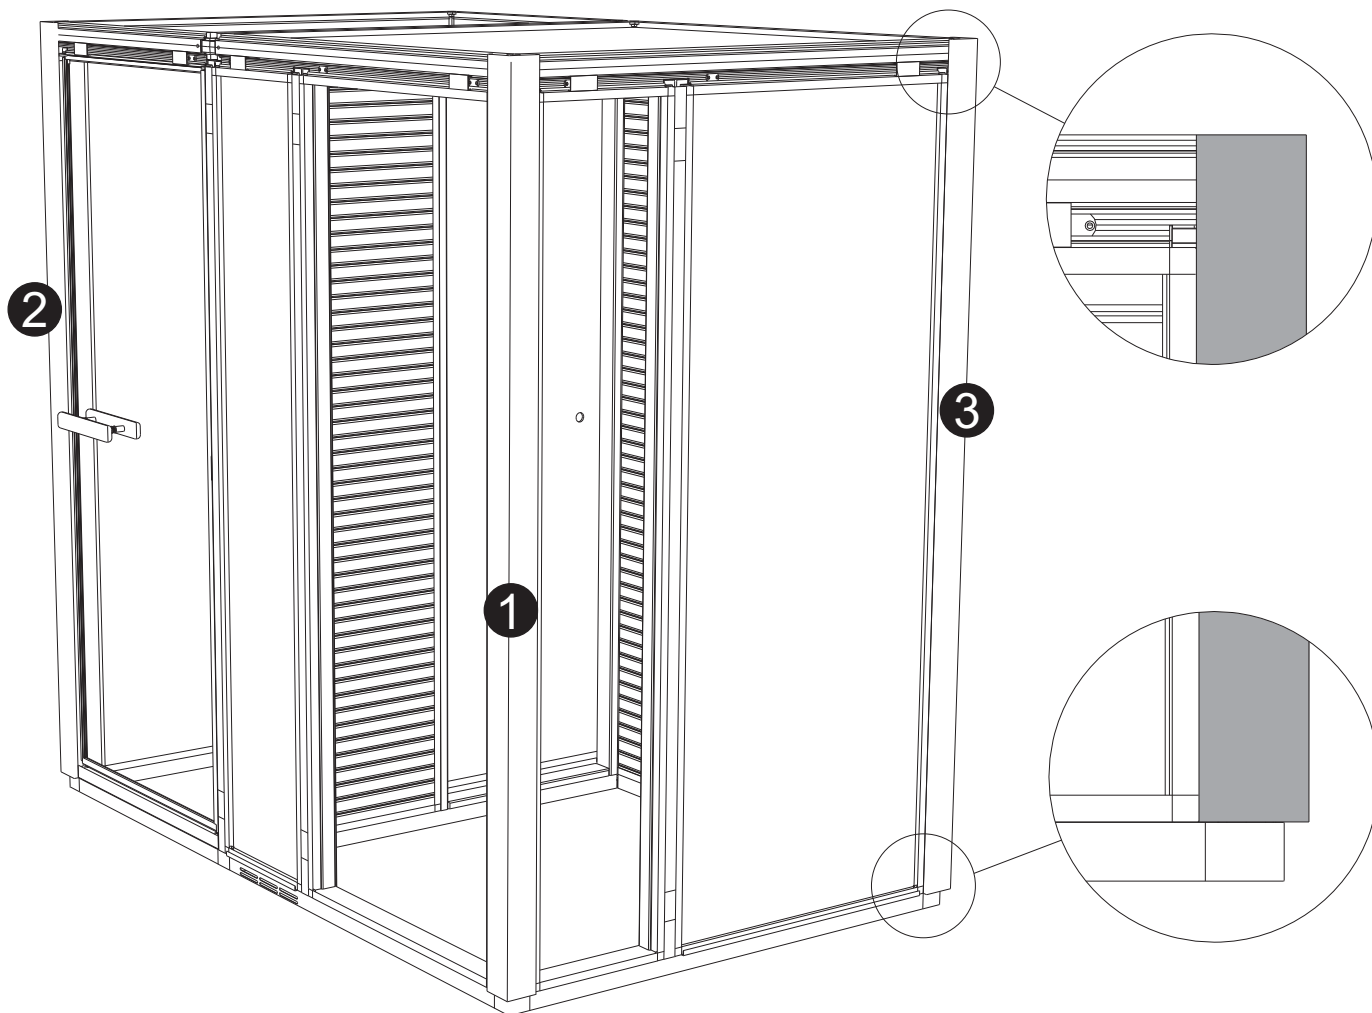

63

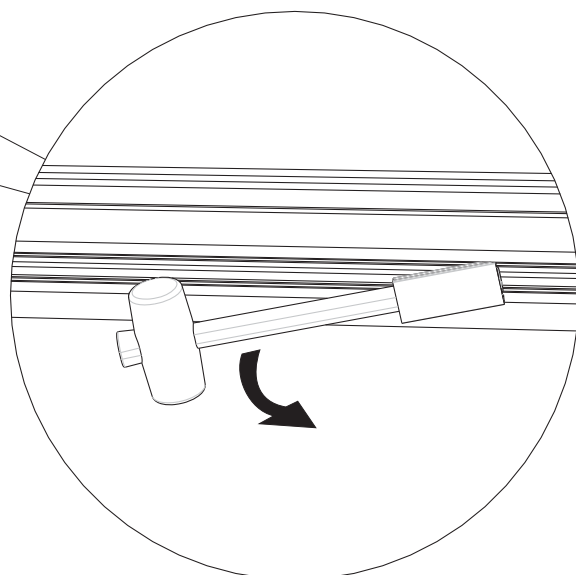

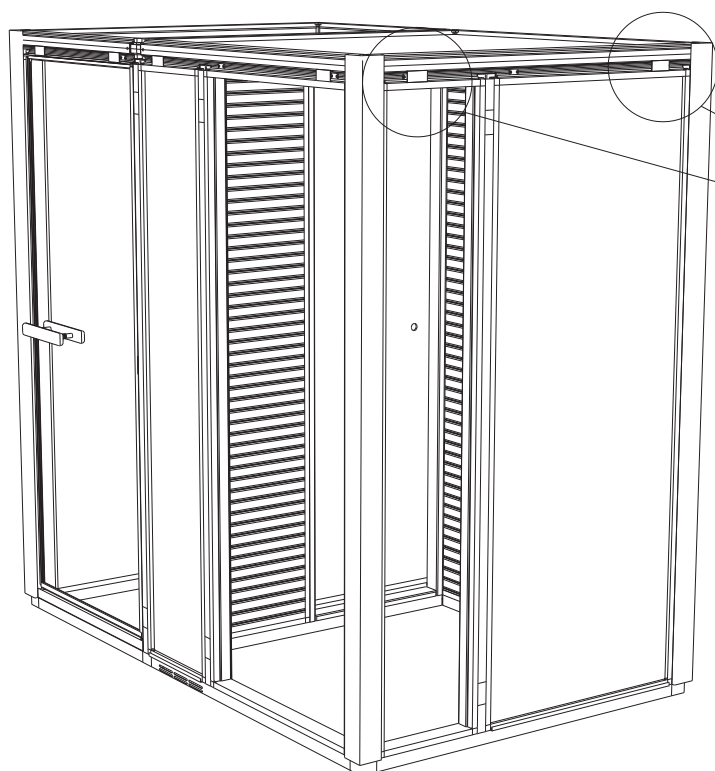

Banka med handen i hörnet på hörnprofilerna för att fästa dem.

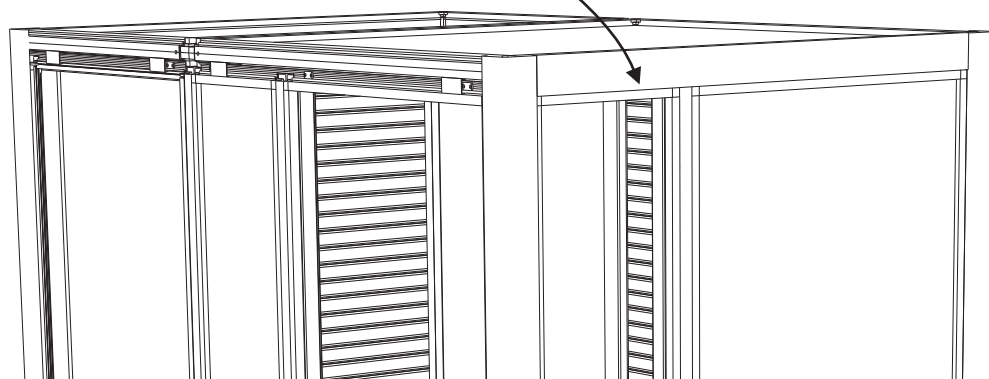

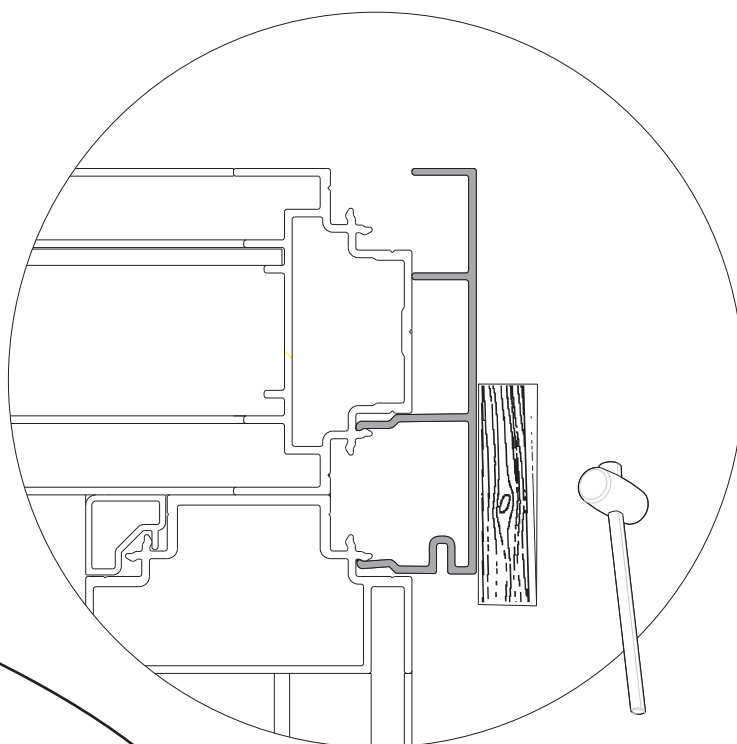

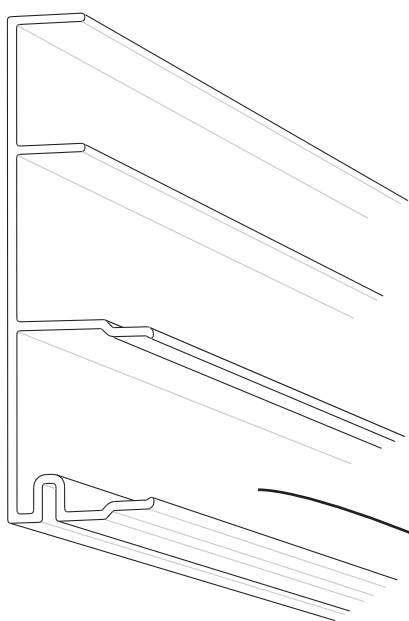

Hit the corner of the corner profiles with your hand in order to fasten them.

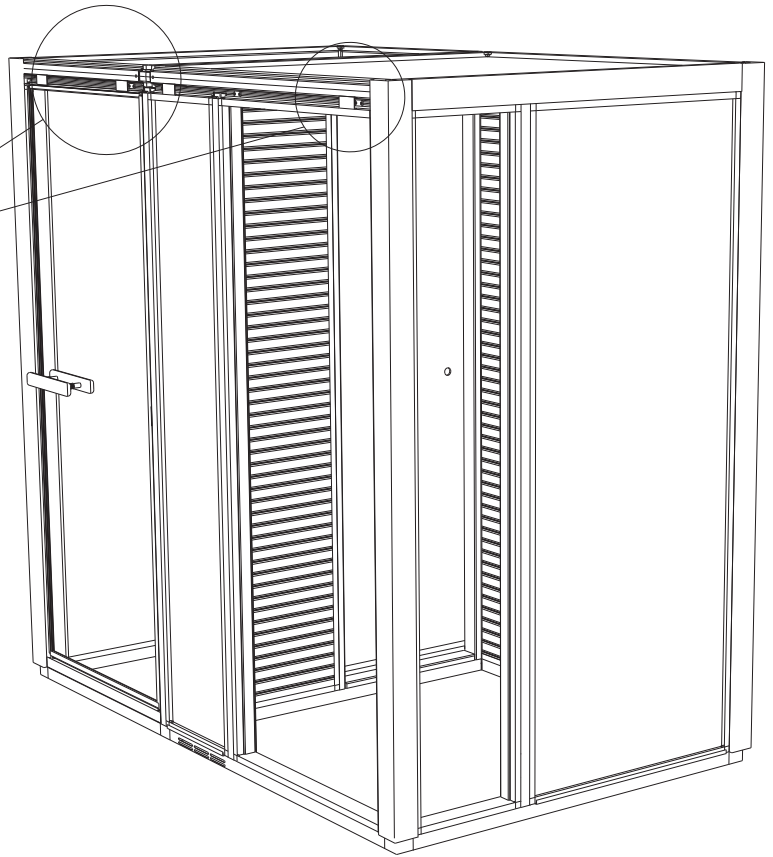

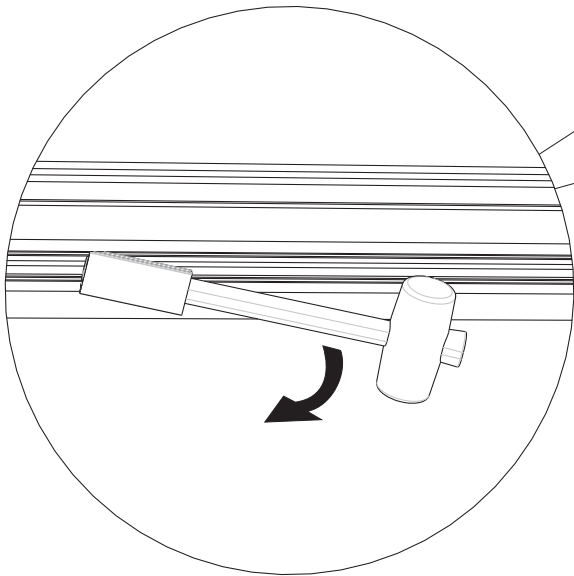

64

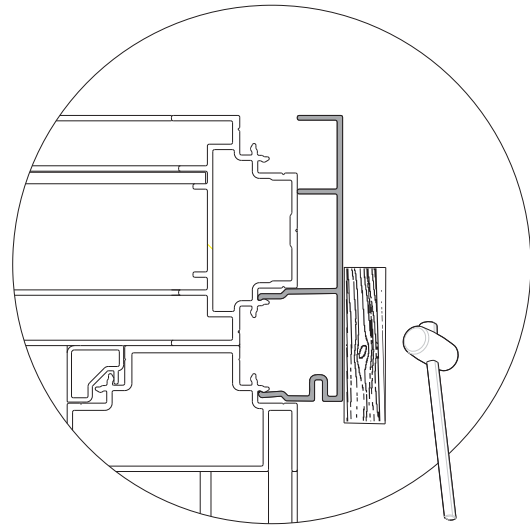

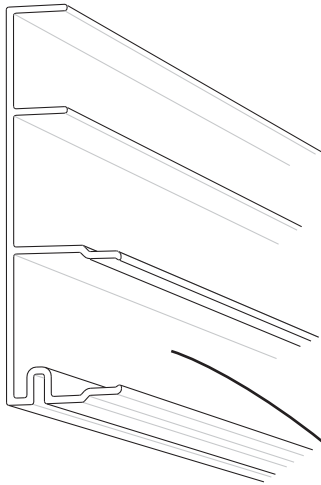

P4
1168mm

65

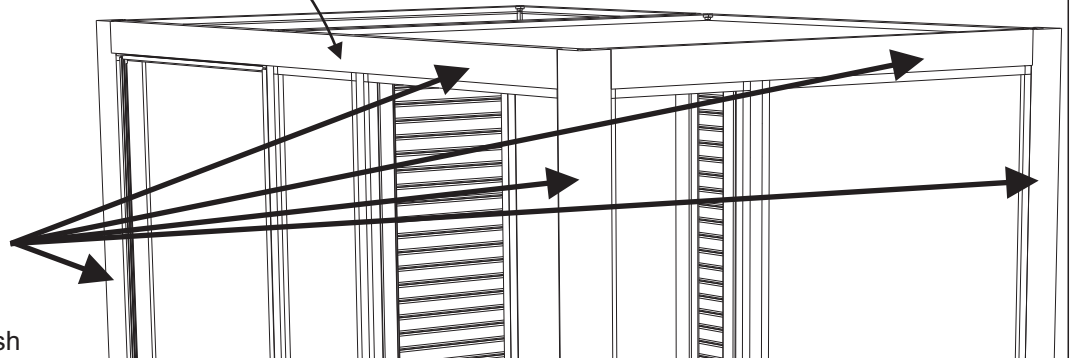

P4
1968mm

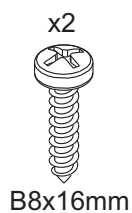

TIPS! För bästa resultat,
polera de fem frontprofilerna
med bilvax.

N.B.! For a better result, polish
the front five profiles using car wax.

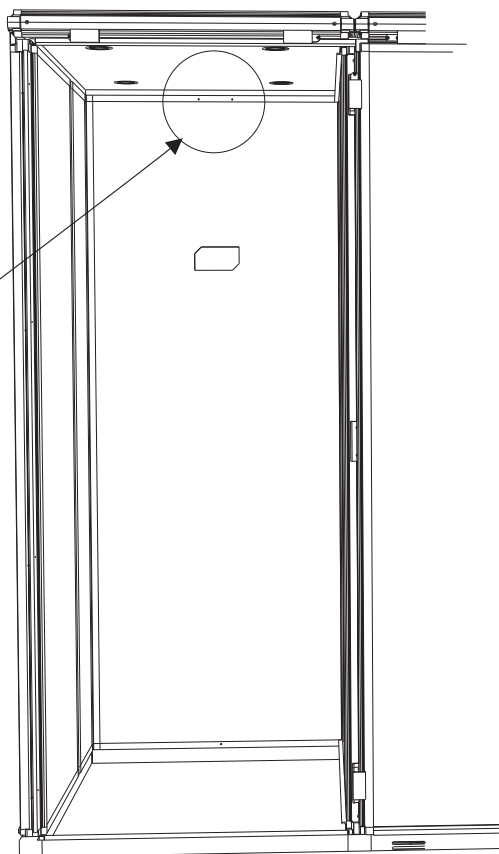

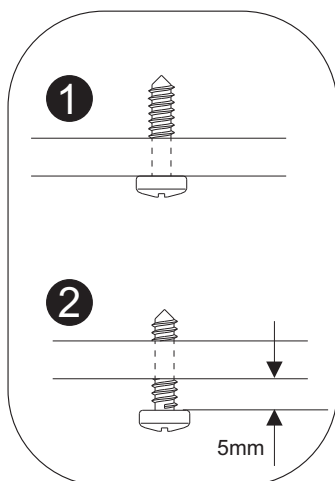

66

Skruva först in de båda skruvarna så att de bottnar. Skruva sedan ut dem 5 mm.

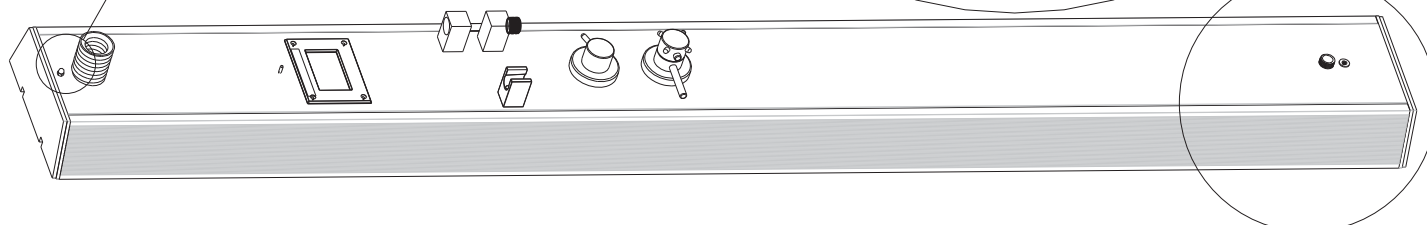

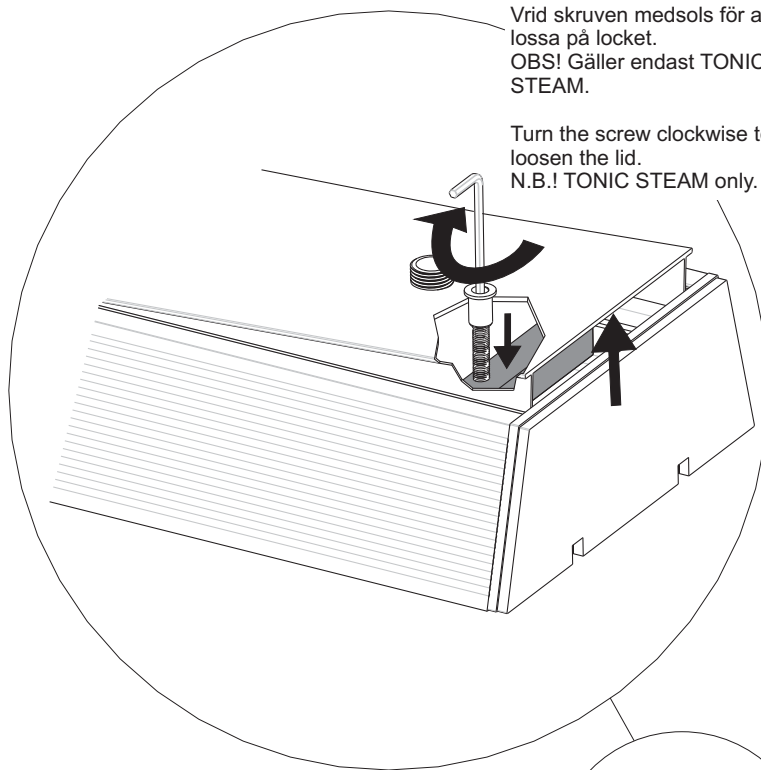

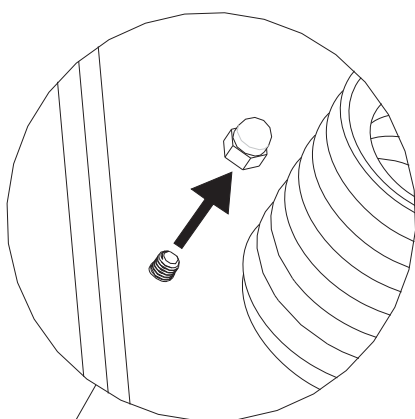

First tighten both of the screws firmly. Then unscrew them 5 mm.

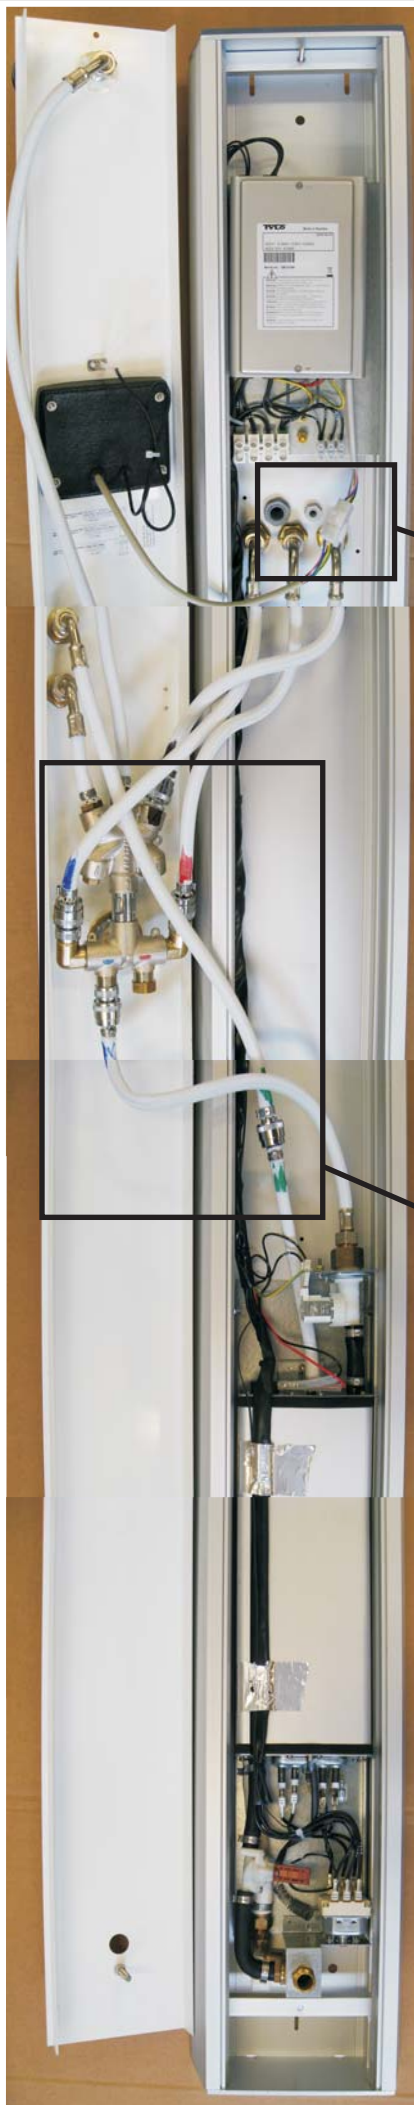

67

Vrid skruven medurs för att lossa på locket.
OBS! Gäller endast TONIC
STEAM.

Turn the screw clockwise to
loosen the lid.
N.B.! TONIC STEAM only.

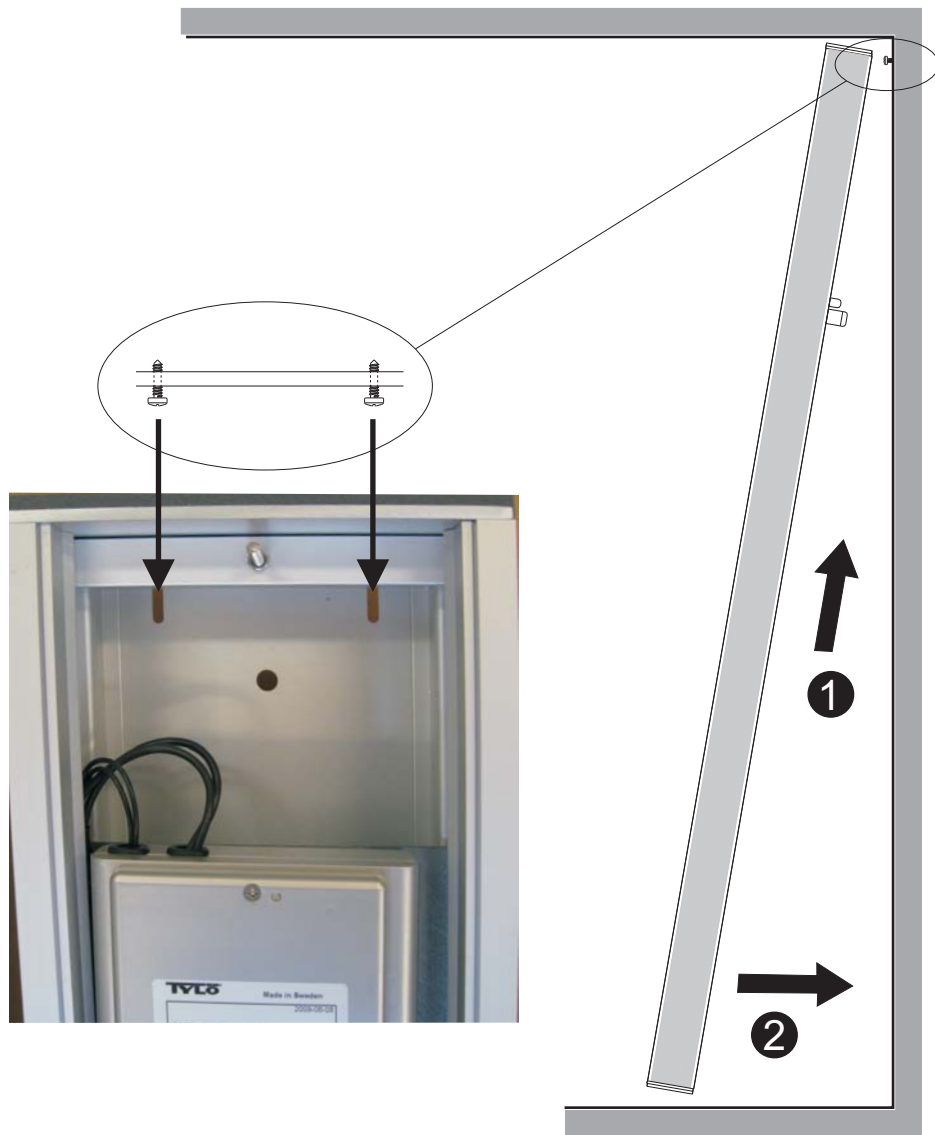

Koppla loss elkopplingen och de fem snabbkopplingarna för vatten, (2xblå, röd, grön och brun). Lägg sedan locket åt sidan. OBS! Gäller endast TONIC STEAM.

Unplug the power supply and the five quick connect couplings for water. (2xblue, red, green and brown). Put the lid away. N.B.! TONIC STEAM only.

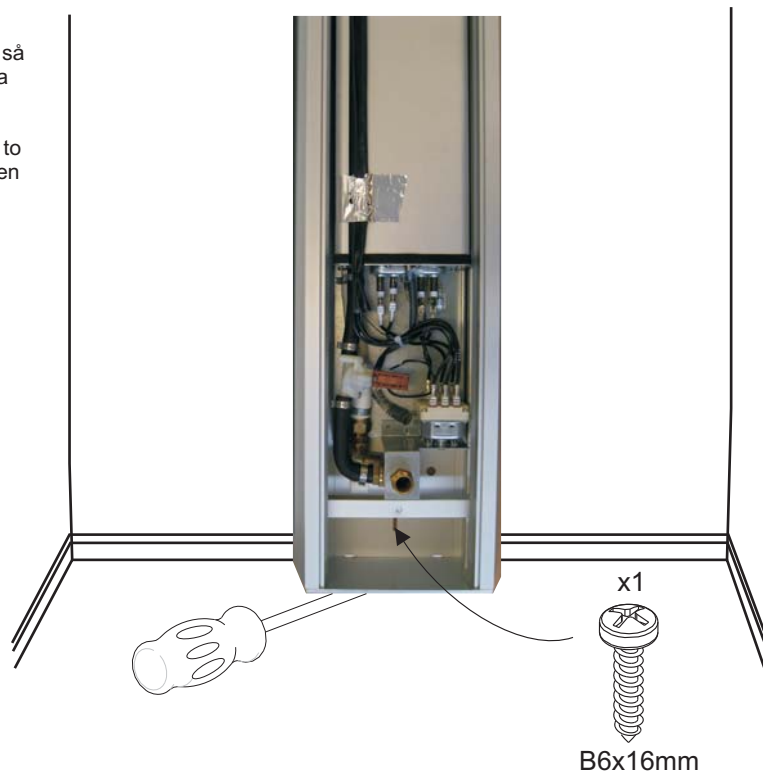

69

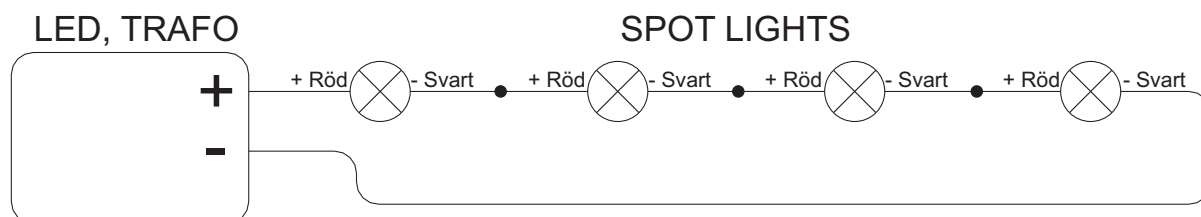

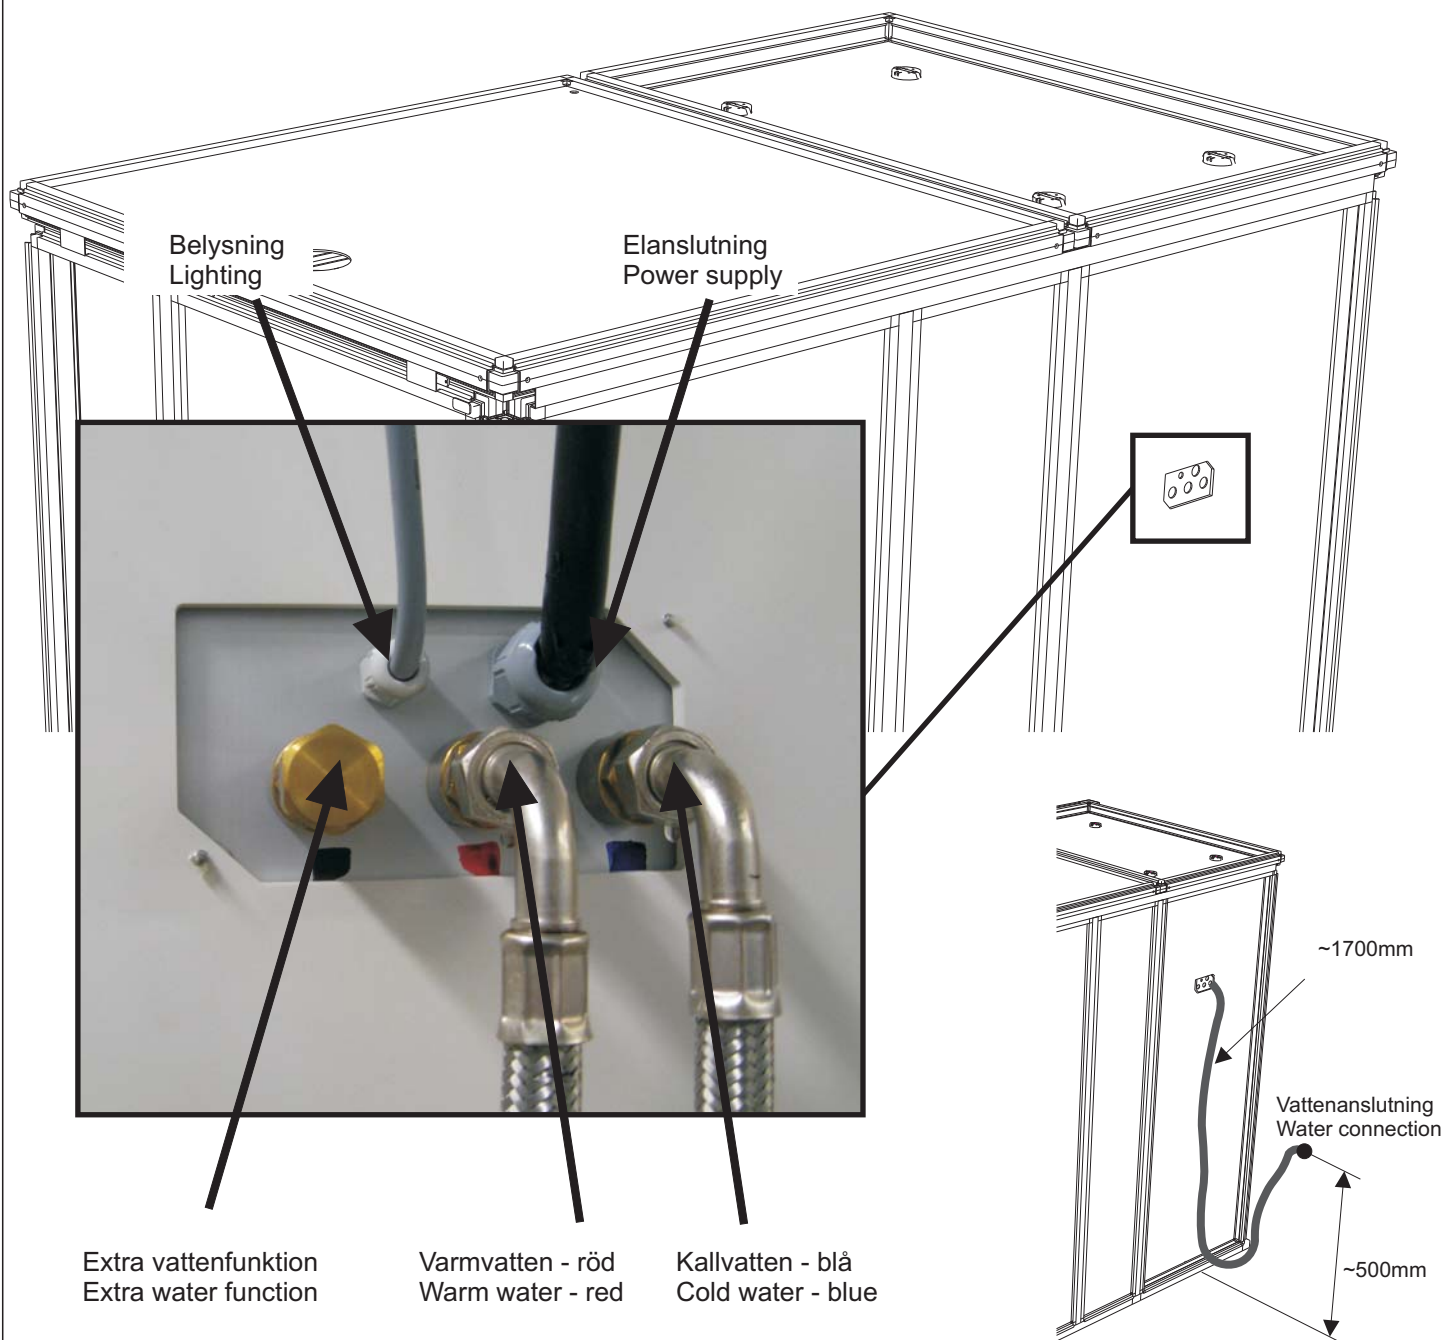

70

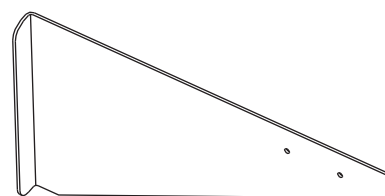

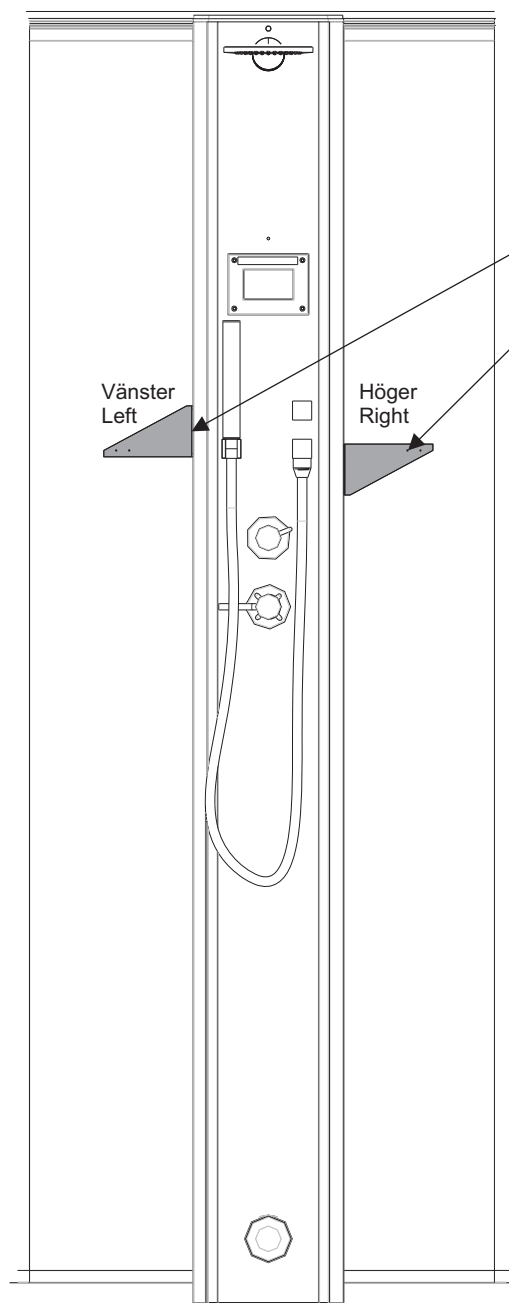

För in en skruvmejsel under pelaren så att den ligger tryckt mot taket. Skruva sedan fast pelaren nedtill.

Put a screwdriver under the column to push it against the ceiling. Then fasten the column at the bottom.

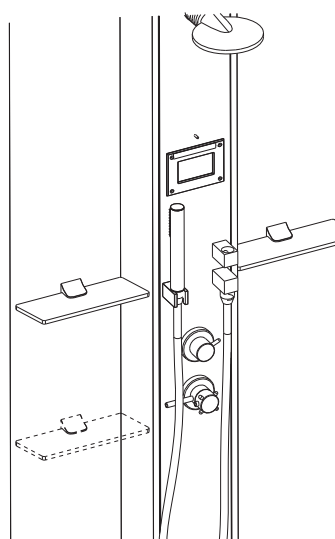

Koppla in el och vatten, anlita behöriga fackmän.
Connect power and water. Use qualified professional.

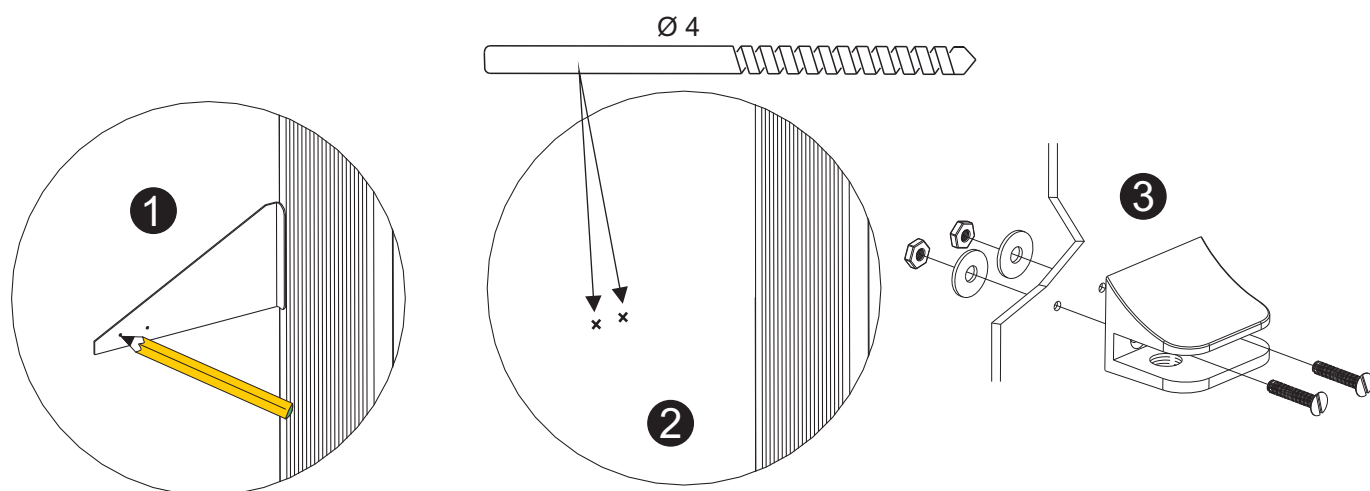

Borrfixtur för hyllplanen
Fixture for drilling the shelves

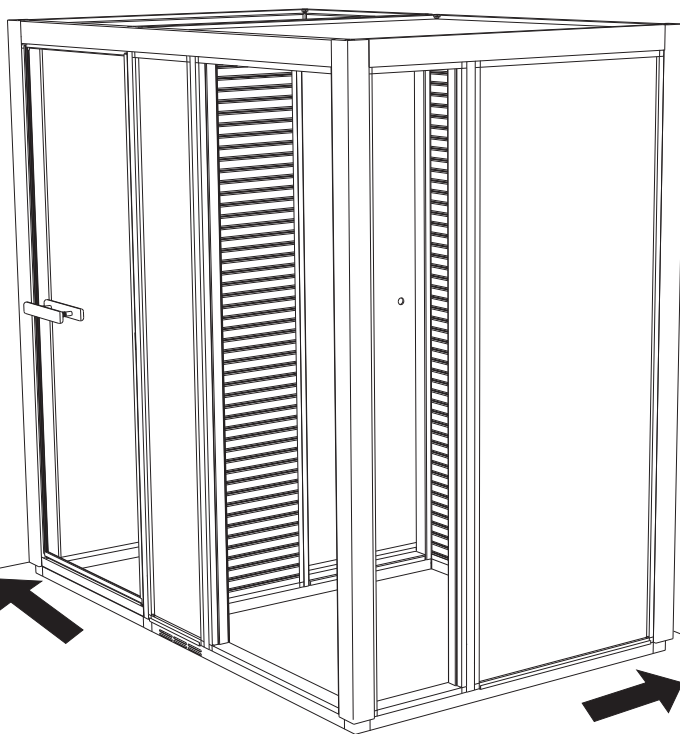

Hyllorna kan monteras på
varsin sida av pelaren eller på
samma sida.

The shelves can be
assembled either on opposite
sides of the column or both
on the same side.

73

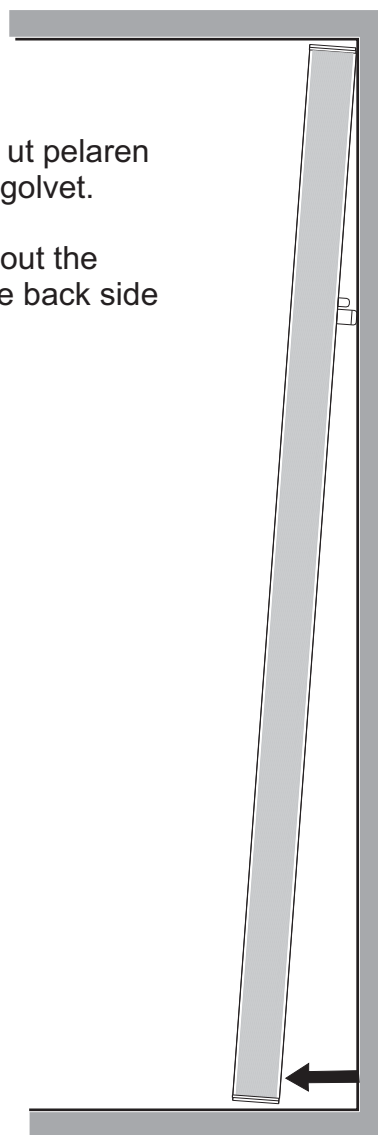

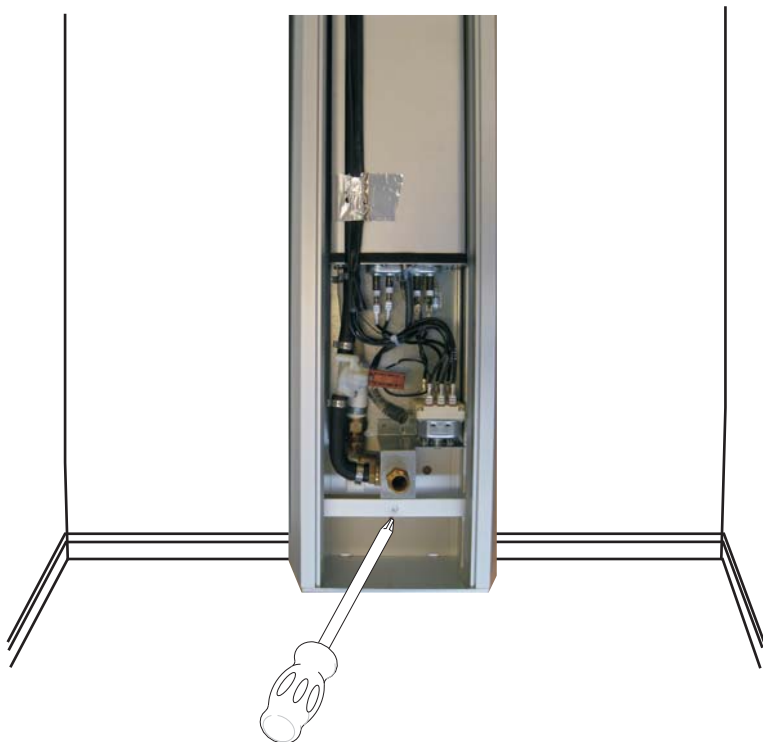

Flytta rummet på plats där det ska stå.

Move the room in place.

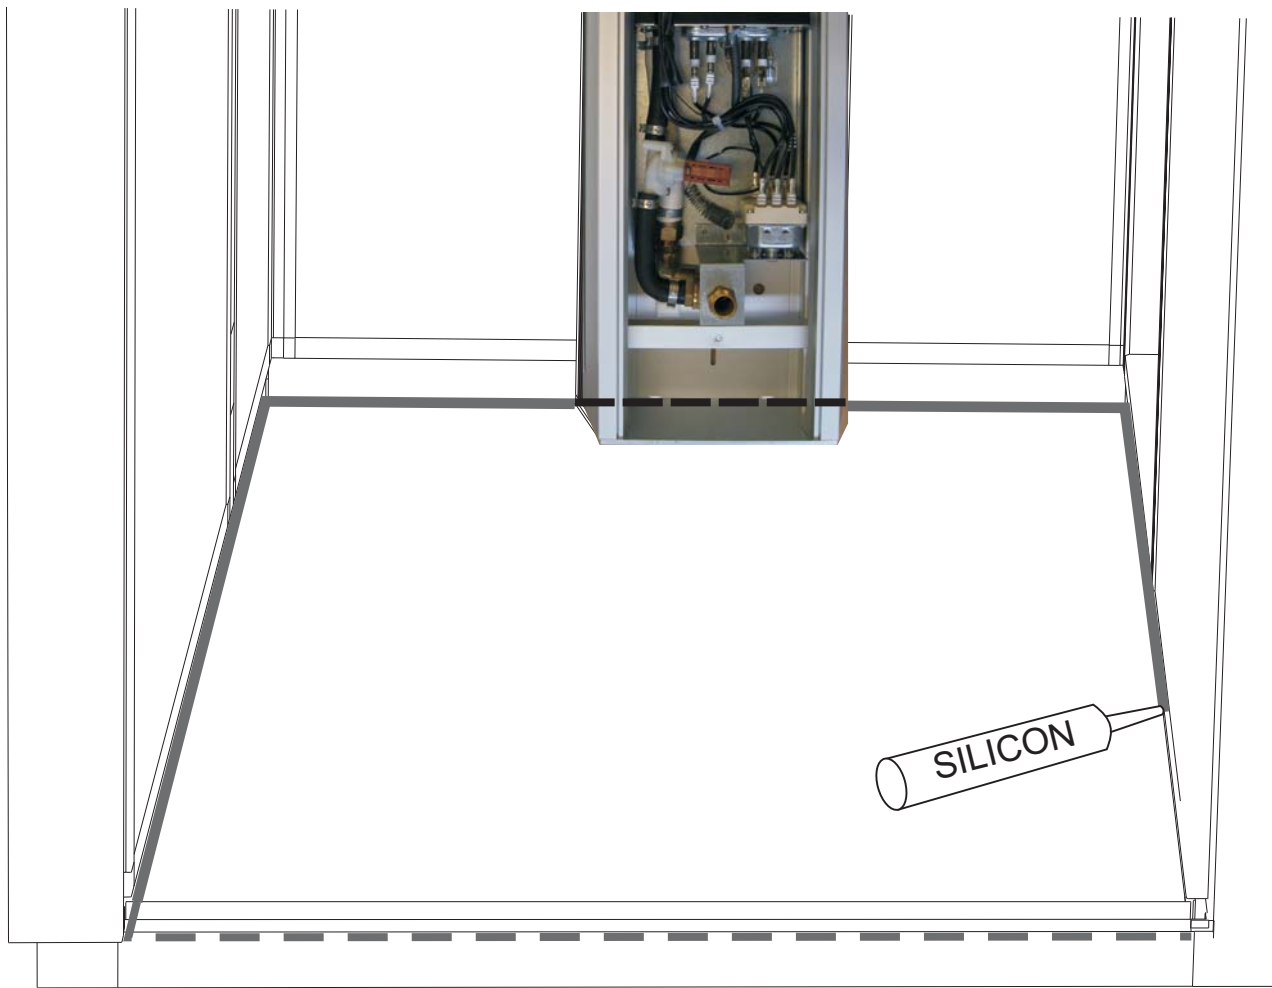

74

Lossa skruven längst ned på pelaren. Dra ut pelaren nedtill för att komma åt bakom längs med golvet.

Loosen the bottom screw on column. Pull out the column down below to be able to reach the back side along the floor.

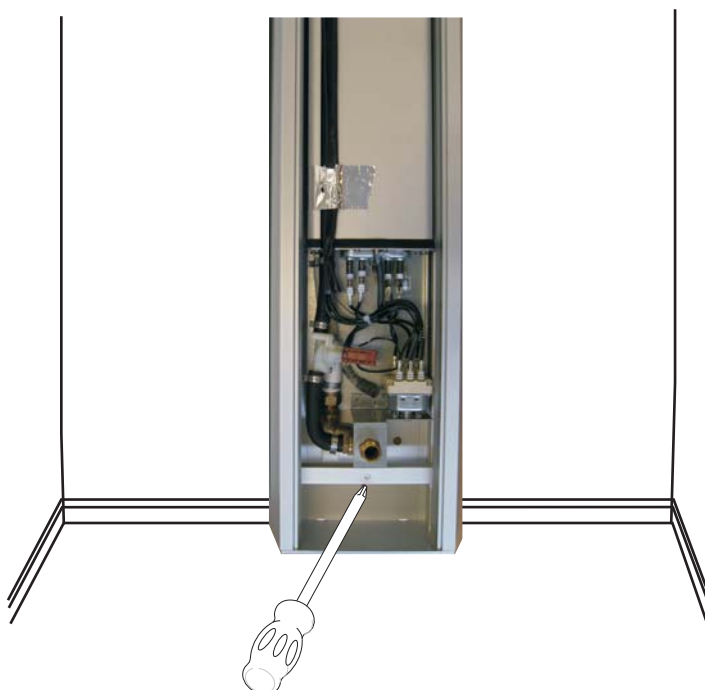

75

Lägg en sträng silicon runt om på golvet i duschutrymmet.

Put a string of silicone along the floor frame inside the shower.

76

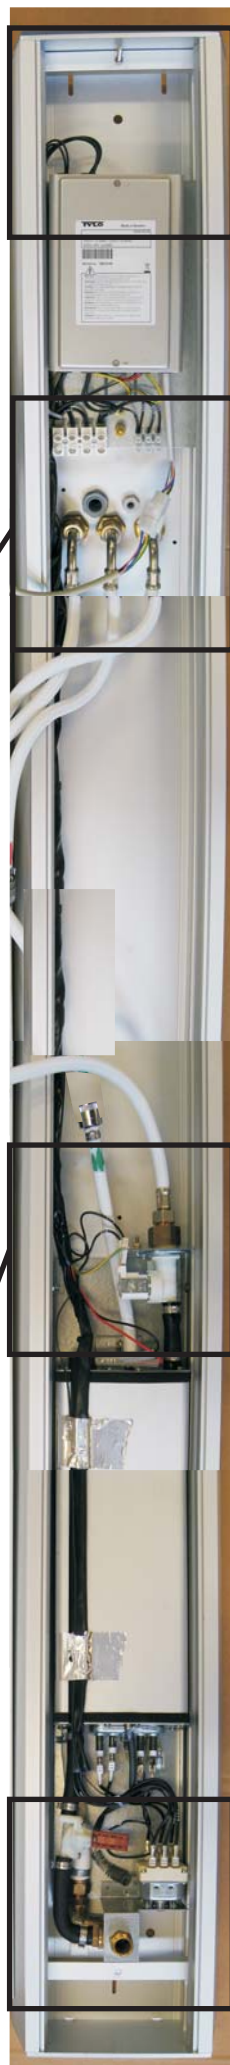

Skruva fast pelaren.

Fasten the column.

Ø 3.3 (x3)

Ø 9.5 (x2)

Hål för ventilation
OBS! Gäller endast
TONIC STEAM.

Holes for ventilation
N.B.! TONIC
STEAM only.

78

Dra åt de båda
övre skruvarna.

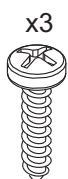

Tighten both the
upper screws.

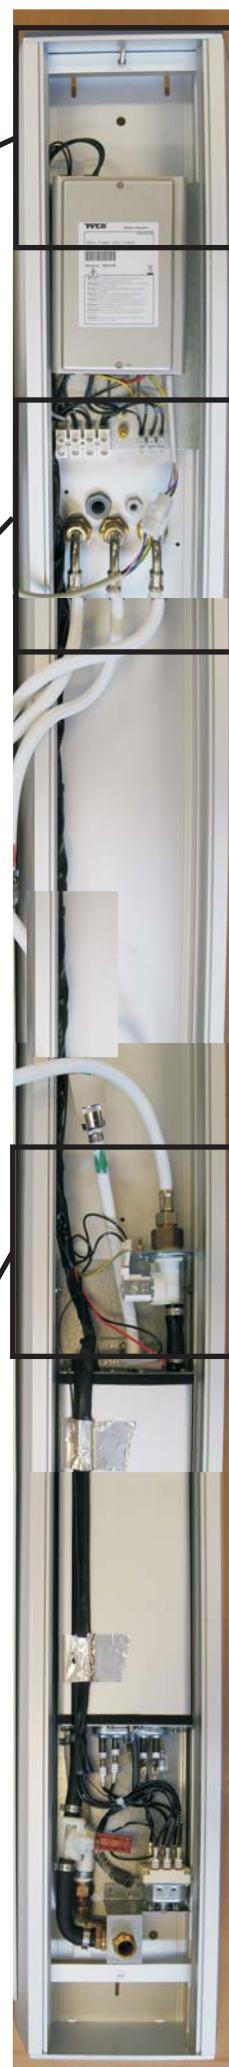

Sätt en siliconklick i
hålet innan skruvarna
sätts dit.

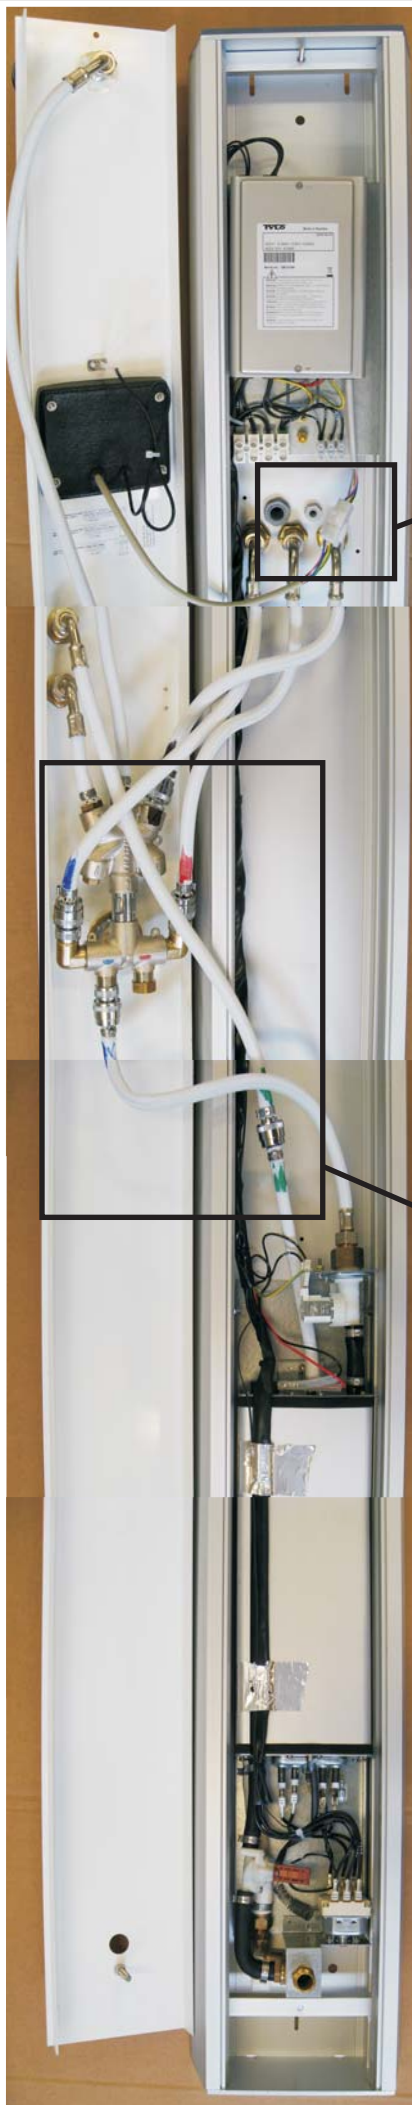

Put a small piece of
silicone in the hole
before the screws.

SILICON

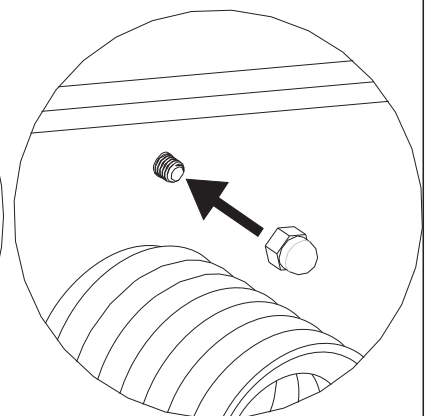

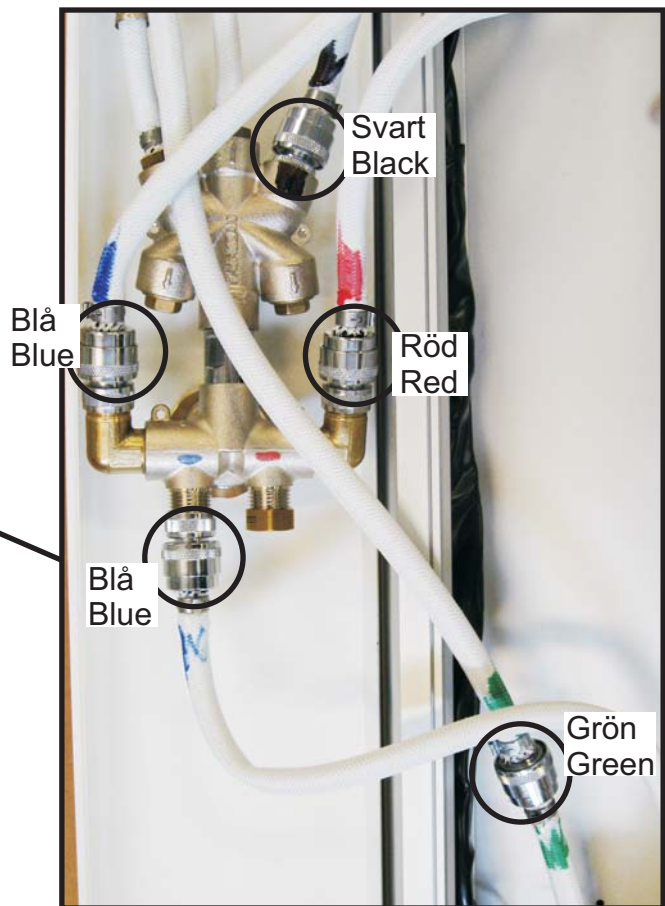

B6x16mm

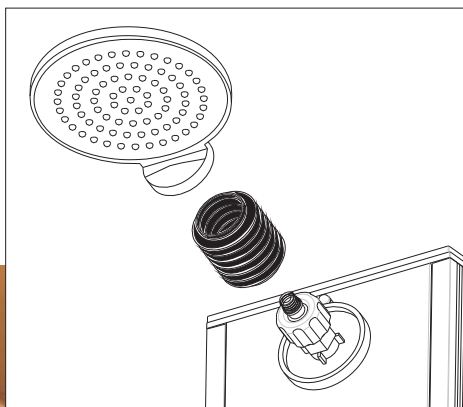

Koppla samman elkopplingen och de fem snabbkopplingarna för vatten, (2xblå, röd, grön och brun). Se till att skruven längst ned på pelaren är utskruvad. Tryck sedan fast locket på pelaren. Skruva dit kupolmuttern längst upp. OBS! Gäller endast TONIC STEAM.

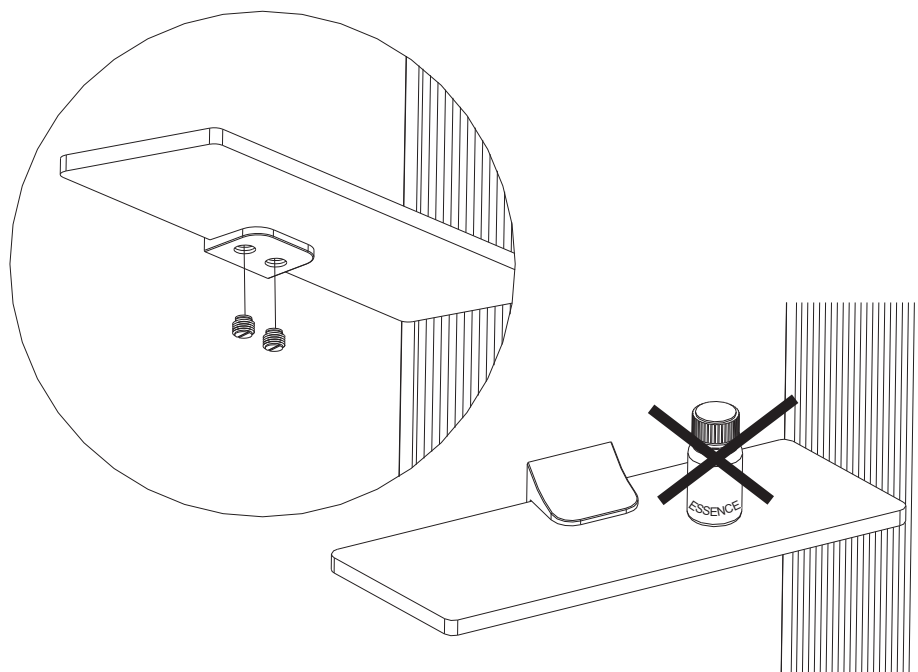

Connect the power supply and the five quick connect couplings for water. (2xblue, red, green and brown). Make sure the screw at the bottom of the column is out. Then fasten the lid on the column. Fasten the screw on top according to picture. N.B.! TONIC STEAM only.

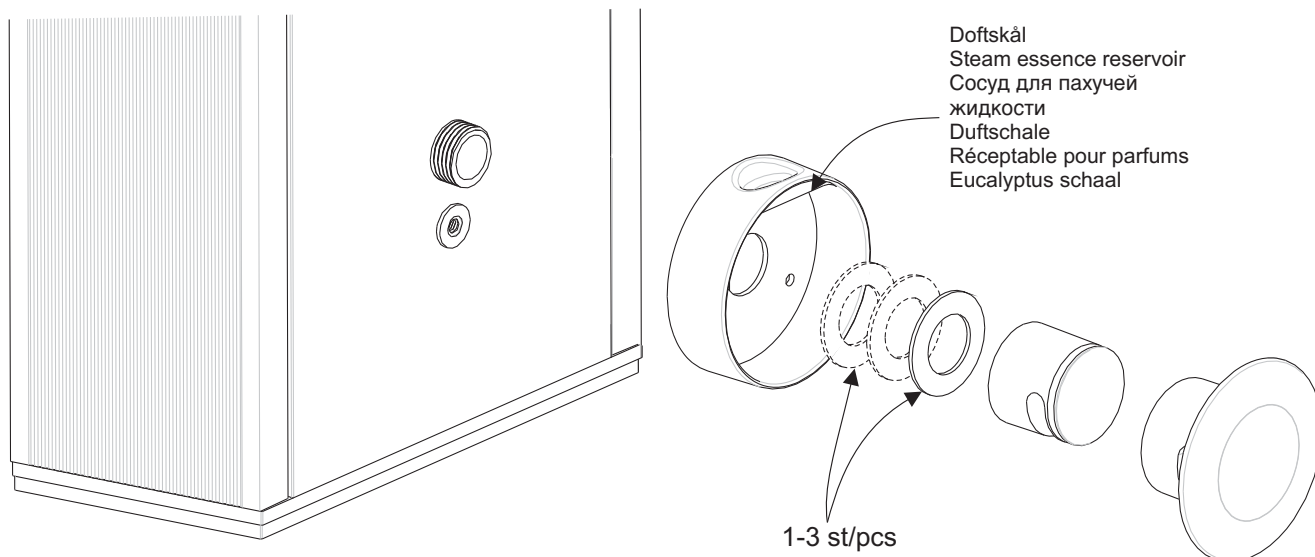

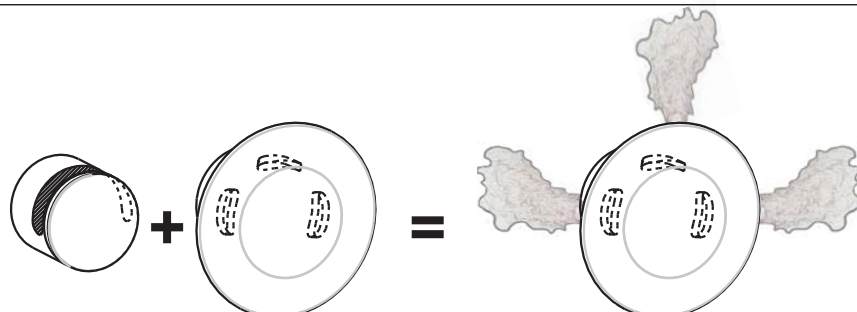

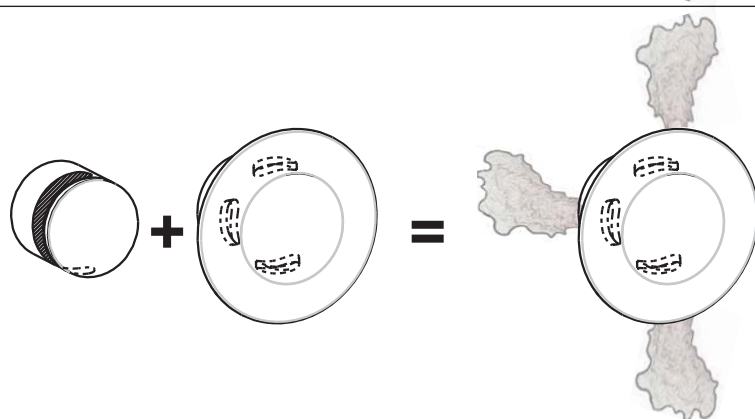

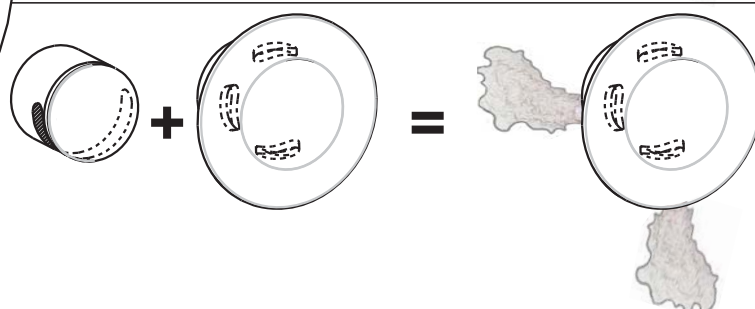

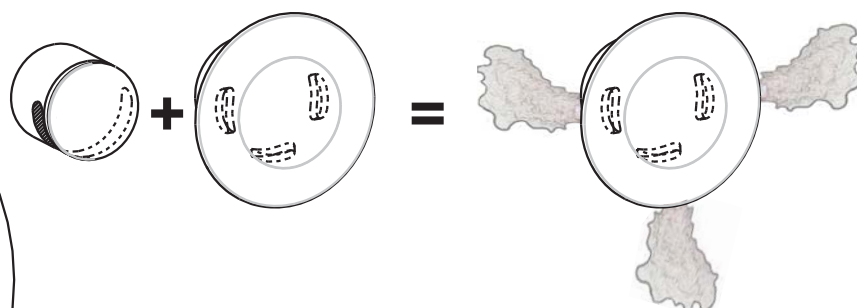

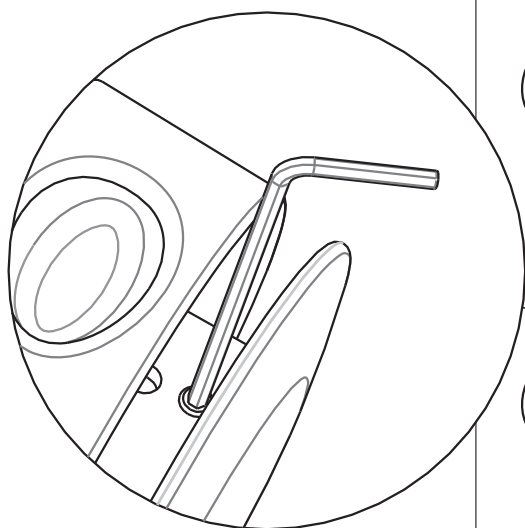

Montera takstril, slang, handstril och hyllor.

Assemble the shower head, hose, hand shower and shelves.
