HEIGHT OF THE BACK FLUE OPENING FROM THE FLOOR TO THE LOWER EDGE OF THE HOLE (mm)	580	640
UPPER FLUE OPENING Ø (mm)	104	129
DISTANCE OF THE CENTRE OF THE UPPER FLUE OPENING FROM THE BACK EDGE OF THE STOVE (mm)	163	163
WEIGHT WITHOUT STONES (kg)	82	95
AMOUNT OF STONES (kg)	150	200

The stove has 2 adjustment legs. Safety distances in the table are to combustible materials, to non-combustible materials at least 50 mm.

Choose the right size wood-heated stove from our wide selection.

Visible tile and glass surface increases the cubic capacity of the sauna. For each tile or glass wall square exceeding 2 m², 3 m³ is added to the sauna capacity. If the walls of sauna are of non-insulated timber, 25 % is added to capacity. In limiting cases always choose a bigger stove model.

Choose the right size stove stones.

The diameter of the stones in a wood-heated stove must be at least 10 cm.
