STEP LADDER ASSEMBLY INSTRUCTIONS

Package Contents

Mounting Accessories:

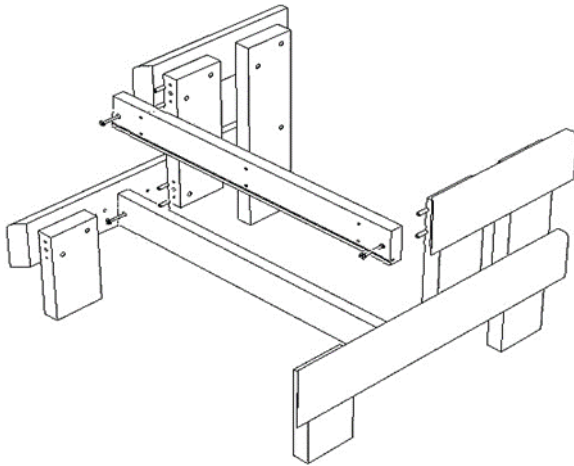

- 4x40 screw 32 pc
- 8x30 dowels 8 pc
- Adjustable feet 4 pc

Components of the step ladder:

- The ends of ladder 2 pc
- Fixing part with the slot 2 pc
- Fixing part without slot 2 pc
- Small fixing part 2 pc
- Wooden slats 4 pc
- The front edge 2 pc
- Cap 2 pc

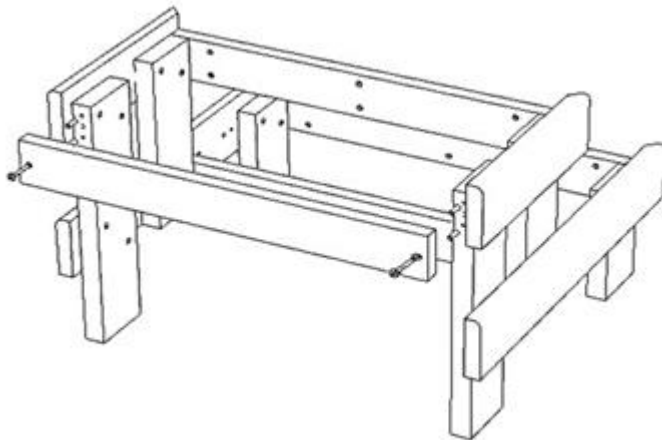

Before assembly, note the following:

Dowels must be input into the special dedicated openings only. Optionally, you may make ladder more durable by lubricating the dowels with special glue for wood before using it.

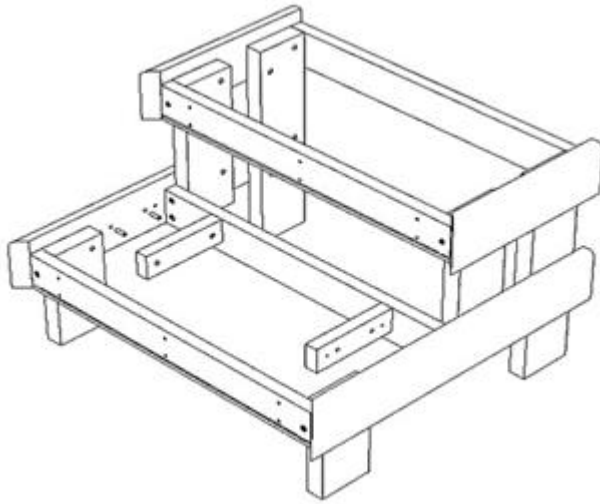

1) Set the ladder ends as shown in the figure. First, fix the front part of the top step fixture slot so that the slot has remained at the bottom. (Do not forget the dowels)

2) Attach the fixing part without slot to the back side of the first step (Do not forget the dowels).

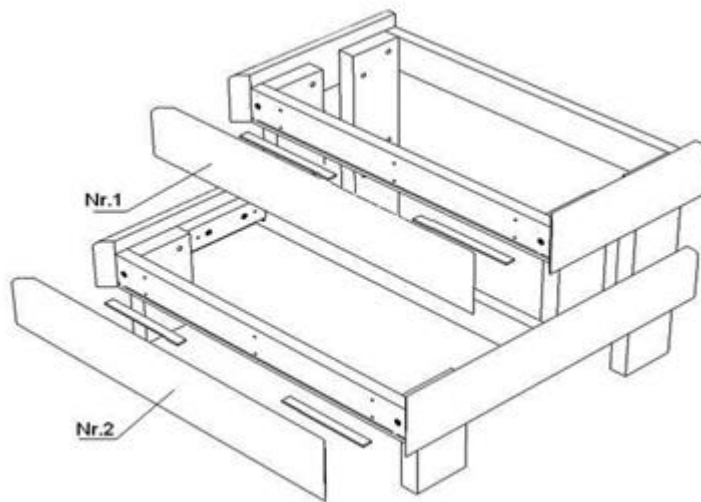

3) Attach the fixing part without slot to the back side of the second step (Do not forget the dowels).

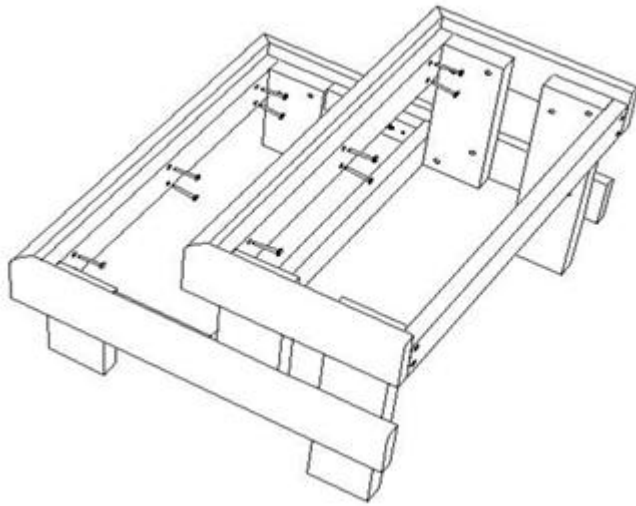

4) Attach the fixing part with slot to the front side of the first step so that the slot would remain in the bottom. (Do not forget the dowels).

5) Secure all the remaining small parts as shown in Fig. (Do not forget the dowels)

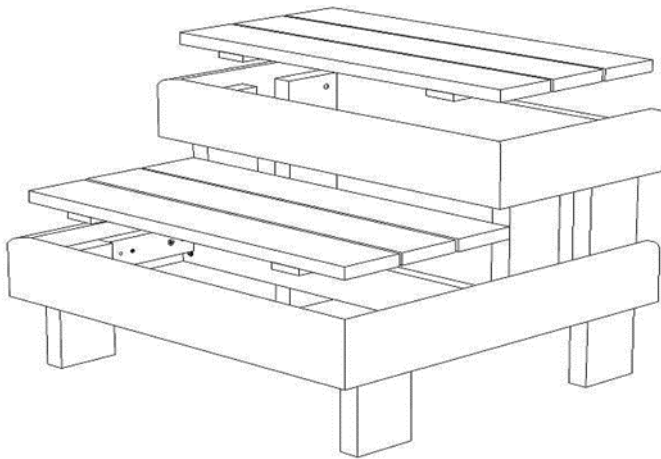

6) Attach wooden slats to slots, as shown below.

7) Install the front edges in its place and check that bevels go to the right slots.

8) Secure the front edge of the rear using the screws as shown in the figure.

9) Set the rack cover in place. Rack covers are detachable, however, they do not fall down if you step on them.
