HOURGLASSES

Sauna accessories.

Little details can make a big difference.

A few well chosen products from the Tylö range of accessories will soon give your sauna room a distinctive character all of its own. You can choose everything from classic, rustic sauna style to the very latest in design – three comprehensive series unique to Tylö, all with the same contemporary look. There is an all-aluminium version, and versions with decorative wooden detailing in alder or aspen – two finishes that are the perfect match for our prefabricated sauna rooms. An insignificant detail, you may say. But, on the other hand, attention to details like this is the hallmark of Tylö thinking.

Our range for public bathing facilities includes a unique solution for water sprinkling, a highly sophisticated fragrance dispenser and a new series of essential accessories in carefully selected materials.

Our previous accessory range, expanded and amended over the years, has been replaced by a carefully composed selection of brand new accessories, each of the very highest quality.

Custom-designed interiors

This picture gives a glimpse of how Tylö can produce interior fittings to meet your exact requirements. Please contact Tylö for consultation and a free estimate.

Sauna stones

Sauna stones (Art. 9014 1000)

Natural stones of igneous dolerite rock (black diabase) that withstand rapid heating and cooling. One carton (approx. 14 kg) is sufficient for heaters with outputs of 6.6–8 kW. Heaters with outputs of 10.7–20 kW require two cartons.

Mini sauna stones (Art. 9014 1005)

As above, but with stones of a suitable size for the smaller Compact and Combi Compact heaters. One carton (approx. 7 kg) per heater.

Olivine stones (Art. 9014 1040)

Recommended only for public facilities and with frequent water sprinkling. Not suitable for Compact and Combi Compact. Low density means quicker heating-up time. One carton: 25 kg.

Stones Wood-fired (Art. 9014 1007)

Larger stones of igneous dolerite rock (black diabase) specially selected for use with wood-fired sauna stoves. Larger stones mean better air circulation and longer heat retention.
