

THE NEW PENDULUM RELAXATION BENCH FOR YOUR HOME.

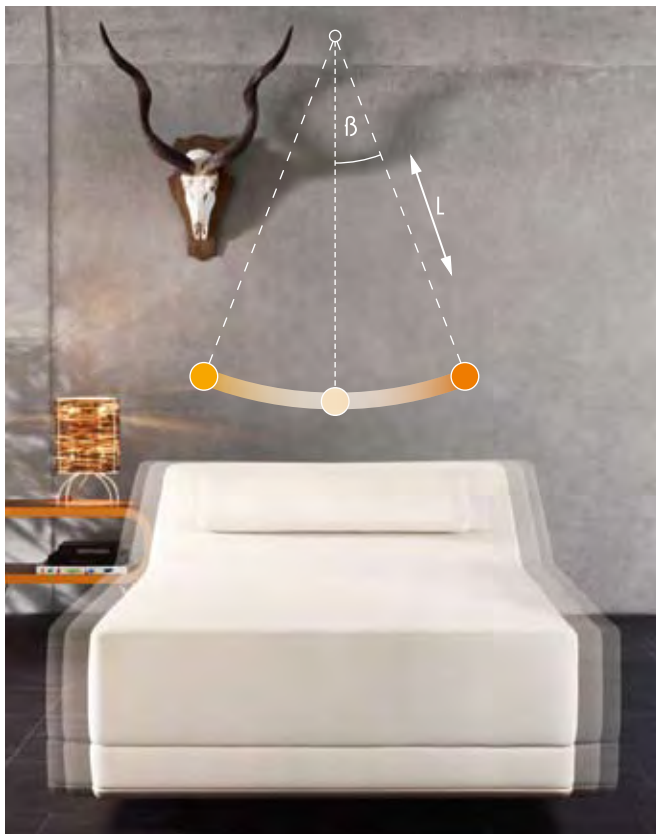

# THE FIRST RELAXATION BENCH USING MOTION TO HELP YOU UNWIND

Now there is a simple way for you to generate energy while you are sleeping: With power napping. Simply close your eyes and SWAY – the new relaxation bench from KLAFS – will rock you into a rejuvenating power nap with its gentle pendulum motion. Within seconds your body will be overcome by a blissful sensation that will not only allow you to forget the humdrum of everyday life but you will be oblivious to the motion of the relaxation bench. Instead, the pendulum frequency sees to it that body and mind comes to rest. Even if you do not go into a deep sleep during this time, all it takes is 15 to 20 minutes to wake up fully relaxed once again. As a “side effect” not only are your concentration and performance enhanced, but you are able to get on with your day with greater zest. Irrespective of the time of day!

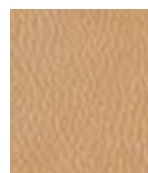

*A safety concept that has inspired the German Association for Technical Inspection, TÜV: Not only is the appearance of the aluminium coloured edge-protection strip particularly upscale, but it also ensures safety thanks to the Safety Stop.*

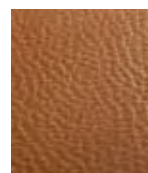

*Findings by the Fraunhofer Institute for Industrial Engineering (IAO) confirms that you relax quicker with the sophisticated motion technology of SWAY than with conventional rest.*

Contemporary and timeless at the same time, the upscale design of SWAY will enhance any ambiance. Whether it is used as a rest bench in the sauna area or as a guest bed or somewhere where your guests can relax – the top quality appearance of the relaxation bench is inviting at a first glance. Technology and adjustable feet disappear below the relaxation bench so that they are not visible, and not only are you given the sensation of floating but it looks as though you are actually floating. A practical added benefit: The height adjustable feet ensure that it stands secure on any floor surface.

For visual compatibility you can choose the colour of the cover to coincide with your personal taste and furnishings. The soft textile leather feels good to the touch, is extremely durable and is easy to clean and maintain. First-rate workmanship and the high quality that is synonymous with KLAFS will guarantee that with SWAY you will be able to achieve wellness for more than just 15 minutes, but for many years to come.

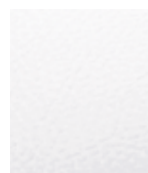

*Sandy beige*

*Foxy gold*

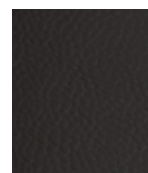

*Chocolate*

*White*

*Fango*

*Black*

*Our selection of available colours in textile leather – our specialised consultants will gladly advise you on other materials.*

*Top quality workmanship in minute detail: Upholstery covers made from textile leather with classical leather grain and ornamental stitching in contrasting colour make SWAY a highly exclusive piece of furniture.*

FOR YOUR SPA.

THE NEW PENDULUM RELAXATION BENCH FOR YOUR SPA.

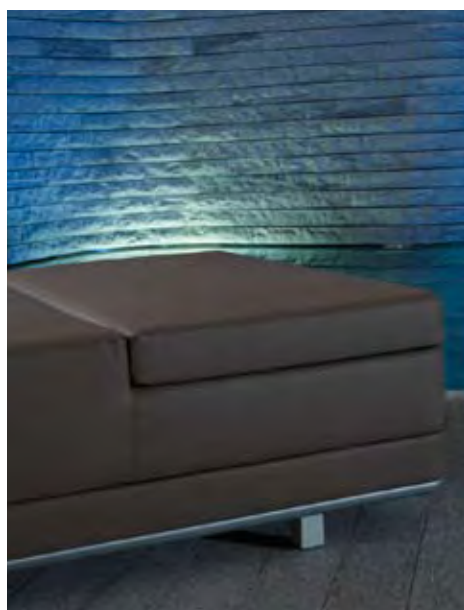

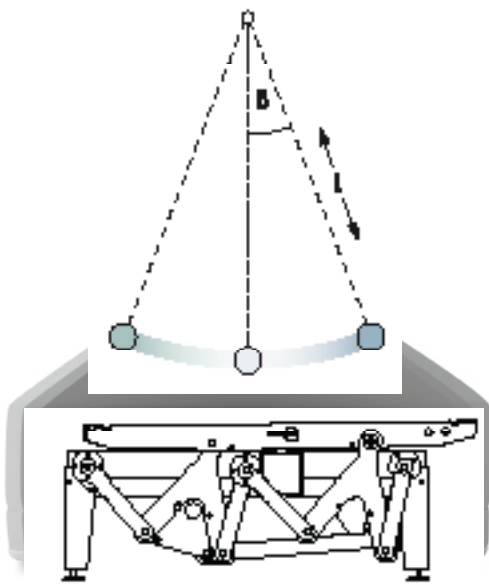

# WE CAN SET A WHOLE LOT IN MOTION TO ENSURE THE WELLNESS OF YOUR GUESTS

Now it is easy to indulge your clients: With sleep. With power napping using SWAY. The innovative pendulum relaxation bench by KLAFS gently rocks the user into a pleasant power nap, which already has a regenerative effect on body and mind after only 15 to 20 minutes. By measuring heart rate variability as a relaxation indicator, the Fraunhofer Institute for Industrial Engineering (IAO) confirms in a study it conducted that the patented pendulum technology is ideal in bringing about fast and intensive relaxation. Within a few seconds only the movement of the relaxation bench is no longer perceived consciously by its users and they will experience a pleasant state of rest and relaxation. Irrespective of whether it is used for the relaxation room of your spa, for use by hotel or congress guests or as an energy-boost on your office floor – upscale design and top-quality workmanship will make for satisfied faces in any environment.

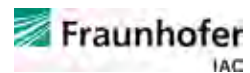

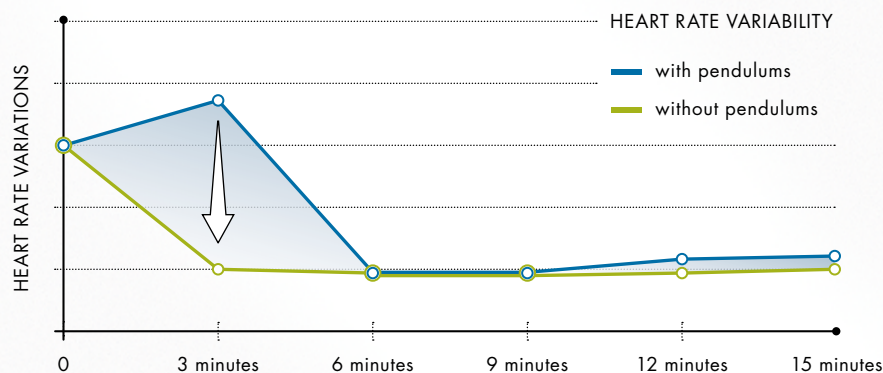

*Equally stylish and functional: The height adjustable head section can be adapted as required by your guests and just like the pendulum function can be operated comfortably by remote control. The German Association for Technical Inspection (TÜV) tested safety concept also gives you complete peace of mind with SWAY.*

*The motor and substructure have been brought to absolute perfection by our industry experts in collaboration with scientists from the Fraunhofer Institute for Industrial Engineering (IAO): The motor runs almost silent – for optimal comfort and relaxation.*

Sleep – and not only at night is one of the best relaxation techniques there is. Even a nap during the day promotes the body's regeneration, while boosting one's concentration, performance and responsiveness at the same time. No small wonder that some companies already ascribe to so-called power napping for themselves and their employees. With SWAY, KLAFS has taken this principle a decisive step further. Because thanks to the unique pendulum function, the relaxation bench not only becomes a comfortable spot to take an invigorating power nap, but it is an effective programme to indulge body and mind. And with guests that are that relaxed, you too can allow yourself the indulgence of a small rest break.

*Results of a study by the Fraunhofer Institute for Industrial Engineering (IAO) confirm: The pendulum motion of SWAY clearly allows the user to relax faster than with normal rest.*
